

Scanning-Out

Overview

The TapeTrack Lite Scan Out function allows you to place volumes in a move status from their current repository to a target repository.

When a volume is put into a move status this only represents the request to move the volume and a second step is required to confirm the movement of the volume.

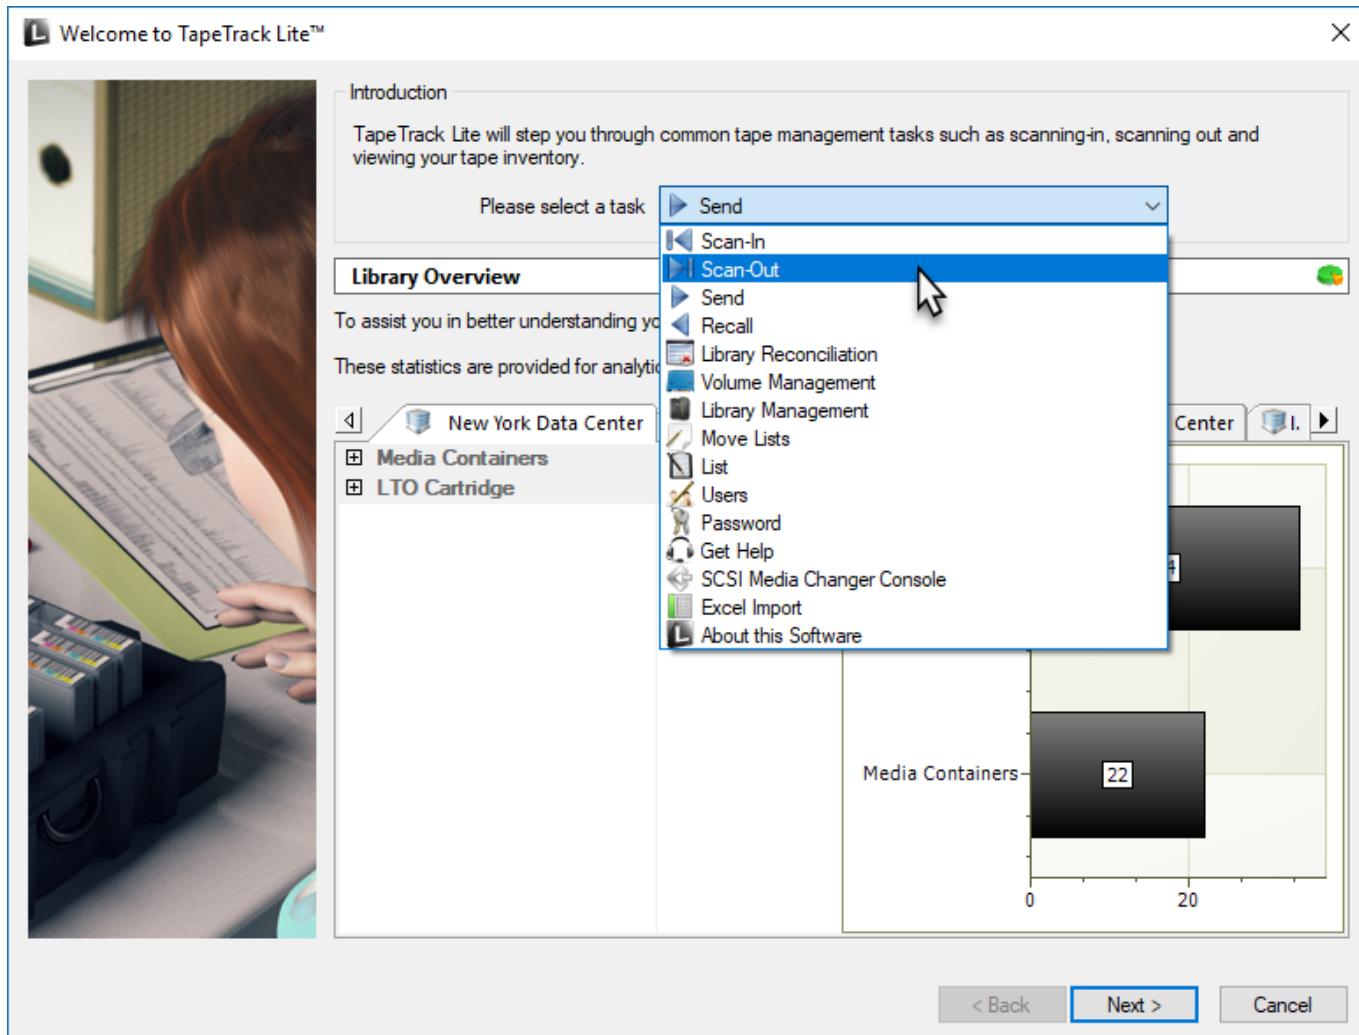

Video Walkthrough

Video coming soon.....

Steps

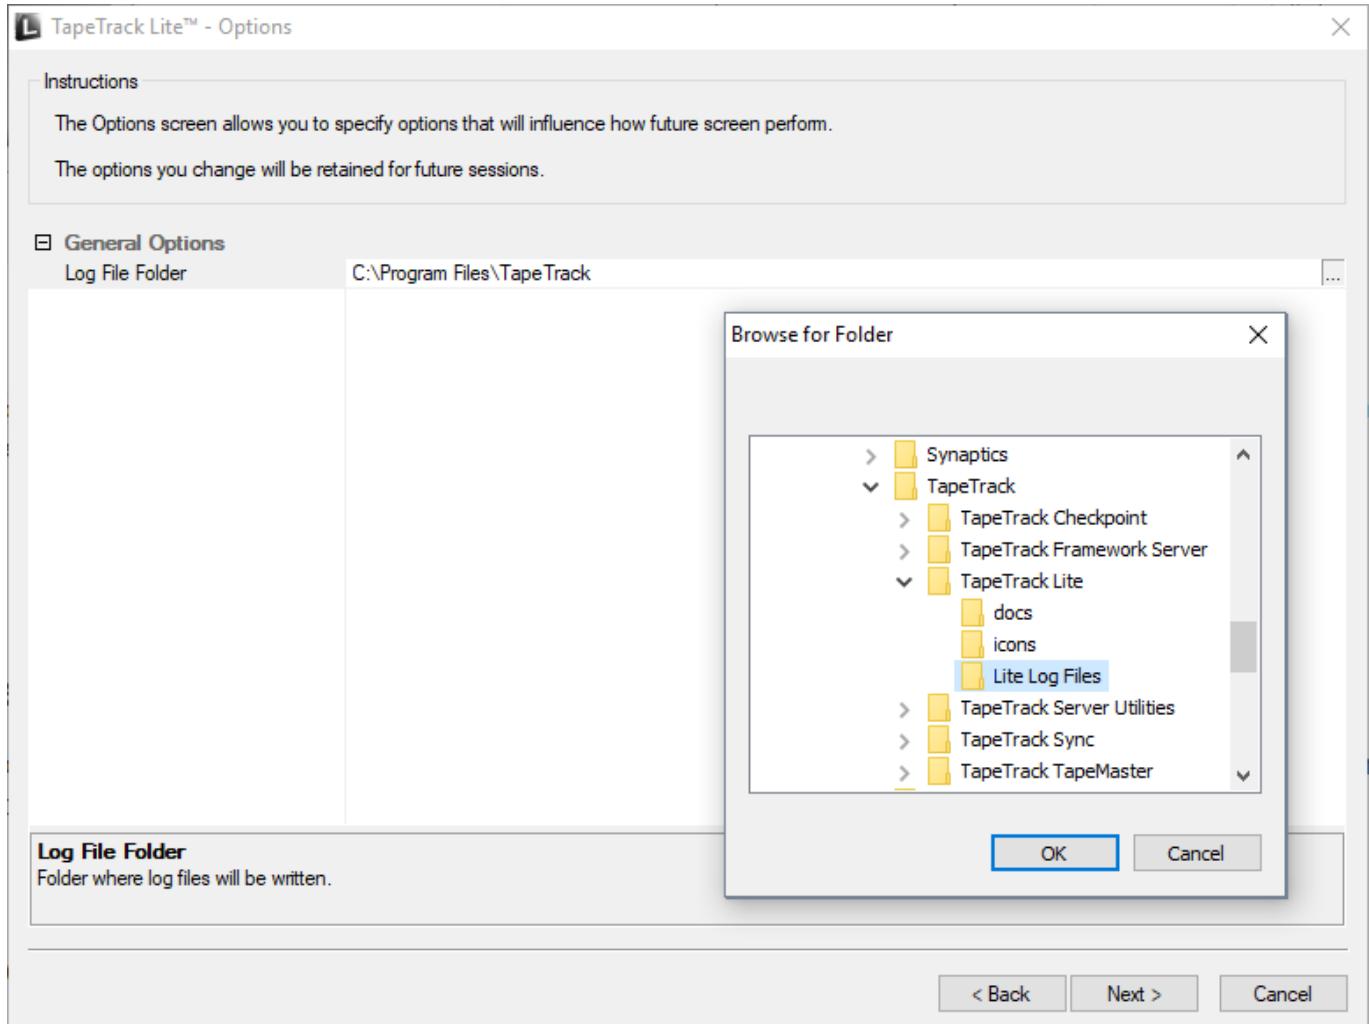

Select Scan Out

1. The TapeTrack Lite Scan Out function allows you to place volumes in a move status from their current repository to a target repository.
2. When a volume is put into a move status this only represents the request to move the volume and a second step is required to confirm the movement of the volume.

Options

This will open the Options window. If required you can set the location for the log files to be written to, or leave the default. To change the default directory, click in the right of the Log File Folder and click on the more options button (...) and select the preferred directory.

Click Next button to continue.

Customer Selection

Select the account or customer that you want to manage tapes for by double-clicking the customer-ID or left clicking the customer-ID and clicking Next at the bottom of the page.

 TapeTrack Lite™ - Customer Selection X

Instructions

The Customer Selection screen allows you to select one TapeTrack Customer that will be the subject of operations in subsequent screens.

You may select a Customer by double clicking the Customer, or by clicking the Customer and pressing the Next button.

Customer	Volumes	Moves
New York Data Center	56	0
Los Angeles Data Center	23	7
North Carolina Data Center	56	23
Nashville Data Center	52	9
	187	39

Remember previously selected Customer

Scan Out Location

In the Scan-Out Location window select a repository to scan out the volumes to by double clicking on the repository or left click to select repository and click Next to proceed.

 TapeTrack Lite™ - Scan-Out Location Selection X

Instructions

The Scan-Out Location Selection screen allows you to select a single Repository from which you will scan each Volume.

You can select a Repository by double-clicking the Repository, or by selecting the Repository and clicking the Next button.

Repository	Volumes	Incoming	Outgoing	Scratch	Scanned-Out
Library	17	4	3	3	0
Offsite Vault	17	3	4	5	0
	34	7	7	8	0

< Back Next > Cancel

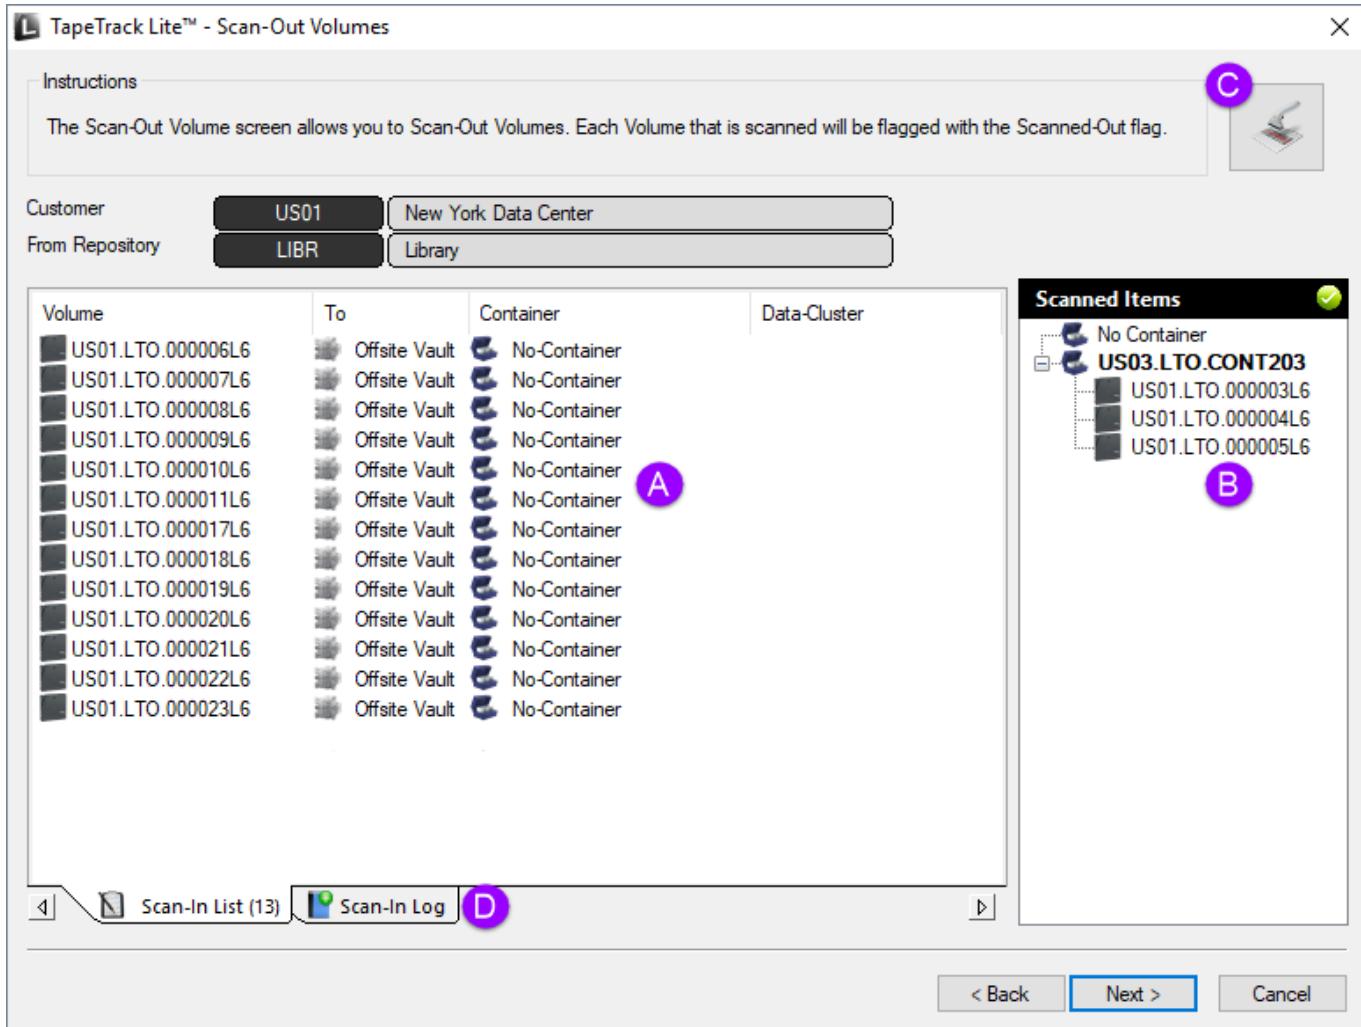

Scan Out Container Location

Select one container by double clicking or by left clicking container ID and clicking Next. To select multiple containers control + left click to select required choices. Containers can also be scanned in by clicking the Open Volume Scan-In window by clicking on Scan-in Button which will launch the [Desktop Scan Window](#) and scanning required containers. If no containers are needed simply click Next.

Container	Capacity	Used	Available	Reserved	Target Repository	Data-Cluster
US01.CONT.CONT002	Undefined	0	Unknown	0		
US02.LTO.000035L6	Undefined	1	Unknown	0		

Scan Out Volumes

The Scan Out Volumes window will display the tapes eligible for scanning out of the selected customer and repository. This window also, by default, opens the Scan Out Volumes input window. Customer-ID and Media-ID values can be entered in the upper right Defaults panel to automatically add these values to the scanned barcodes if required. The field Edit in the Defaults panel can be used to add prefix or suffixes to the volume ID. For example, setting the Customer-ID field to US01, Media-ID field to LTO and Edit field to *L5 will change a barcode of 123456 to US01.LTO.123456L5.

Notes:

- **A** The scan-out window shows the items that need to be scanned.
- **B** The scanned item tree shows the items that have been scanned and associated containers.
- **C** The Scanner button allows you to reiterate the Scanner Window.
- **D** The Scan-Out Log option lists any errors in scanned volumes.

To scan out volumes choose one of the following methods:

[desktop:scan_window](#)

Mouse Input

Close the Scan Out Volumes input window by clicking the X in the top corner. In the Scan Out Volumes window select volumes from list by left clicking volume-ID. Multiple volumes can be selected by using shift + click and/or control + click. Right click selected volume/s and select scan. Volumes can also be scanned out by pressing the spacebar after selecting the volumes. As this method simply checks off the volumes displayed care must be taken to ensure the volume ID's displayed accurately match the volumes being selected to scan out.

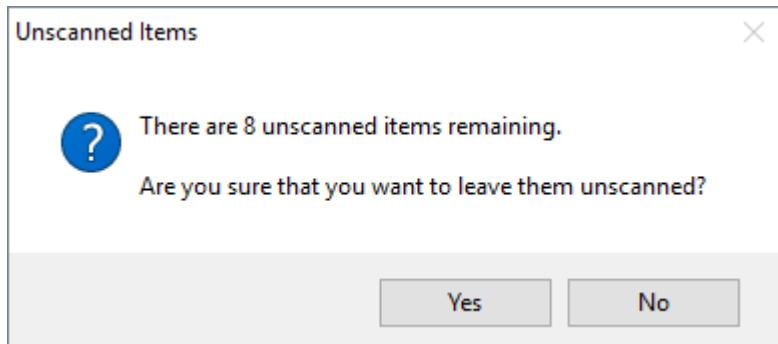

The Scan-Out Volume screen allows you to Scan-Out Volumes. Each Volume that is scanned will be flagged with the Scanned-Out flag.

Customer: US01
From Repository: LIBR

Scanned Items:

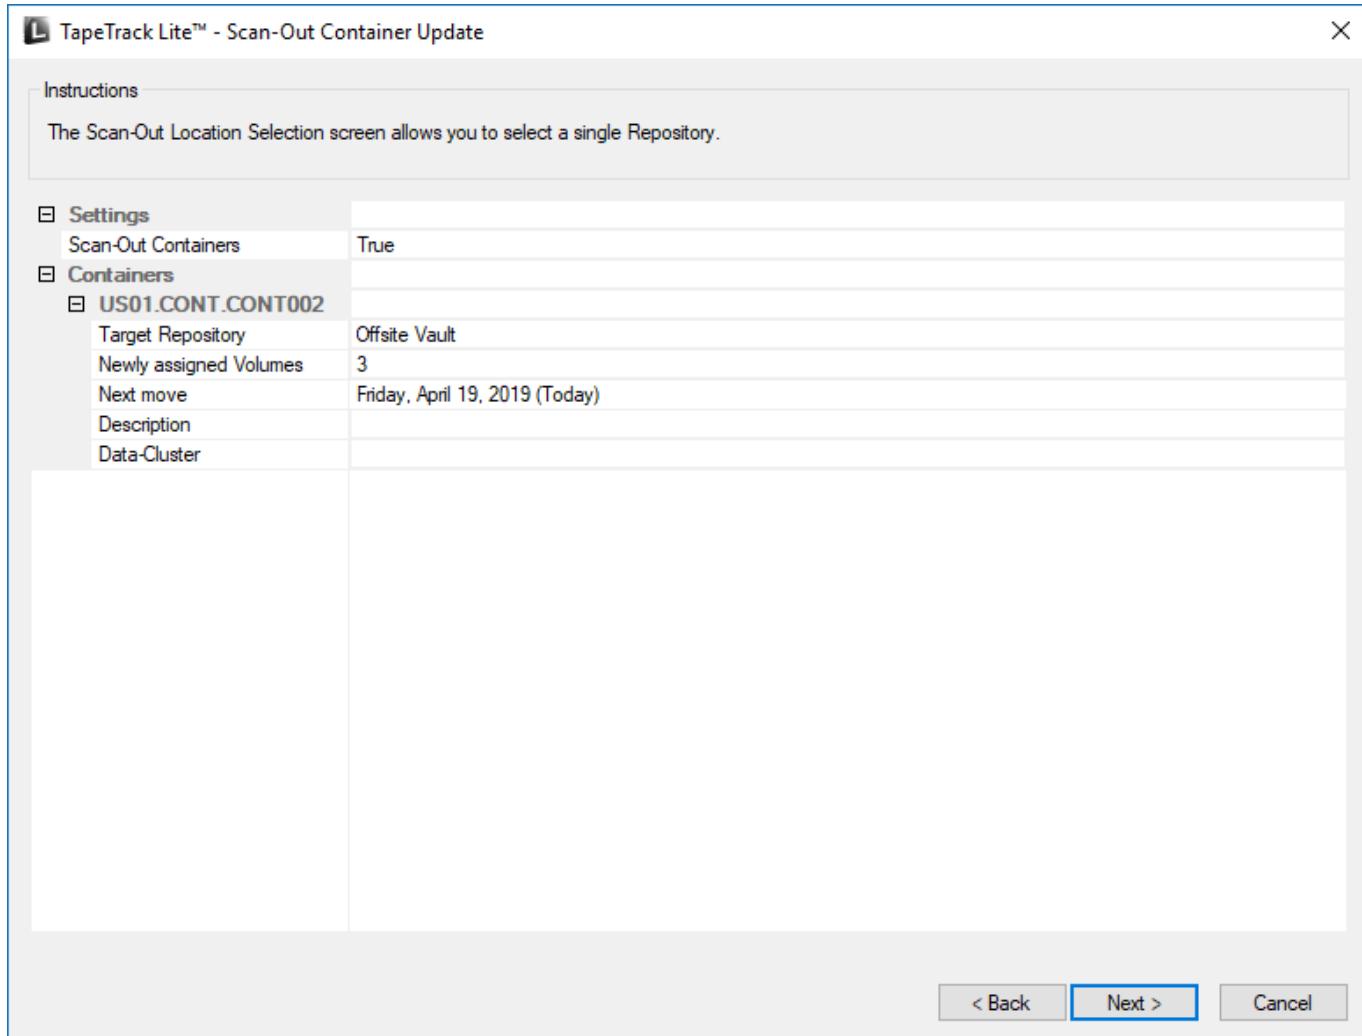

- No Container
- US03.LTO.CONT203
 - US01.LTO.000006L6
 - US01.LTO.000007L6
 - US01.LTO.000008L6
 - US01.LTO.000009L6

When finished scanning out volumes click Next to continue. If you have not scanned out the entire list a warning of Unscanned Items will be displayed. If you wish to scan out the rest of the volumes click No to return to the Scan Out Volumes window. If you wish to continue and leave the remaining volumes unscanned (they can be scanned out at a future time) click Yes to continue.

Scan Out Container Update

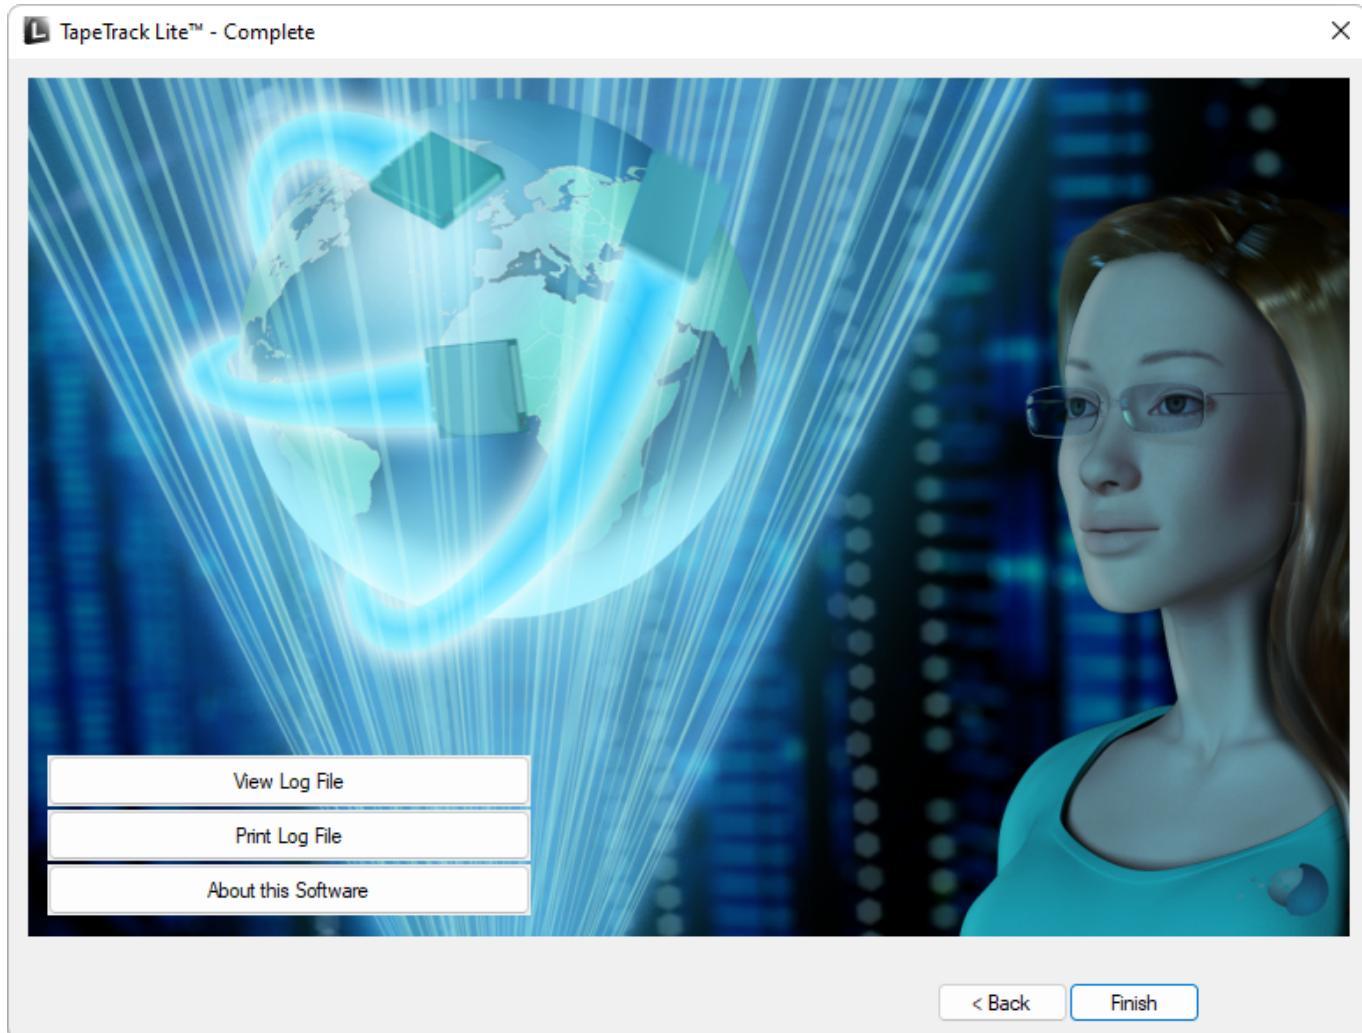

From here you can select a repository.

Complete

This will bring up the Complete window, from here you can

- Click Finish, Cancel or X to exit TapeTrack Lite
