

Scan-Out

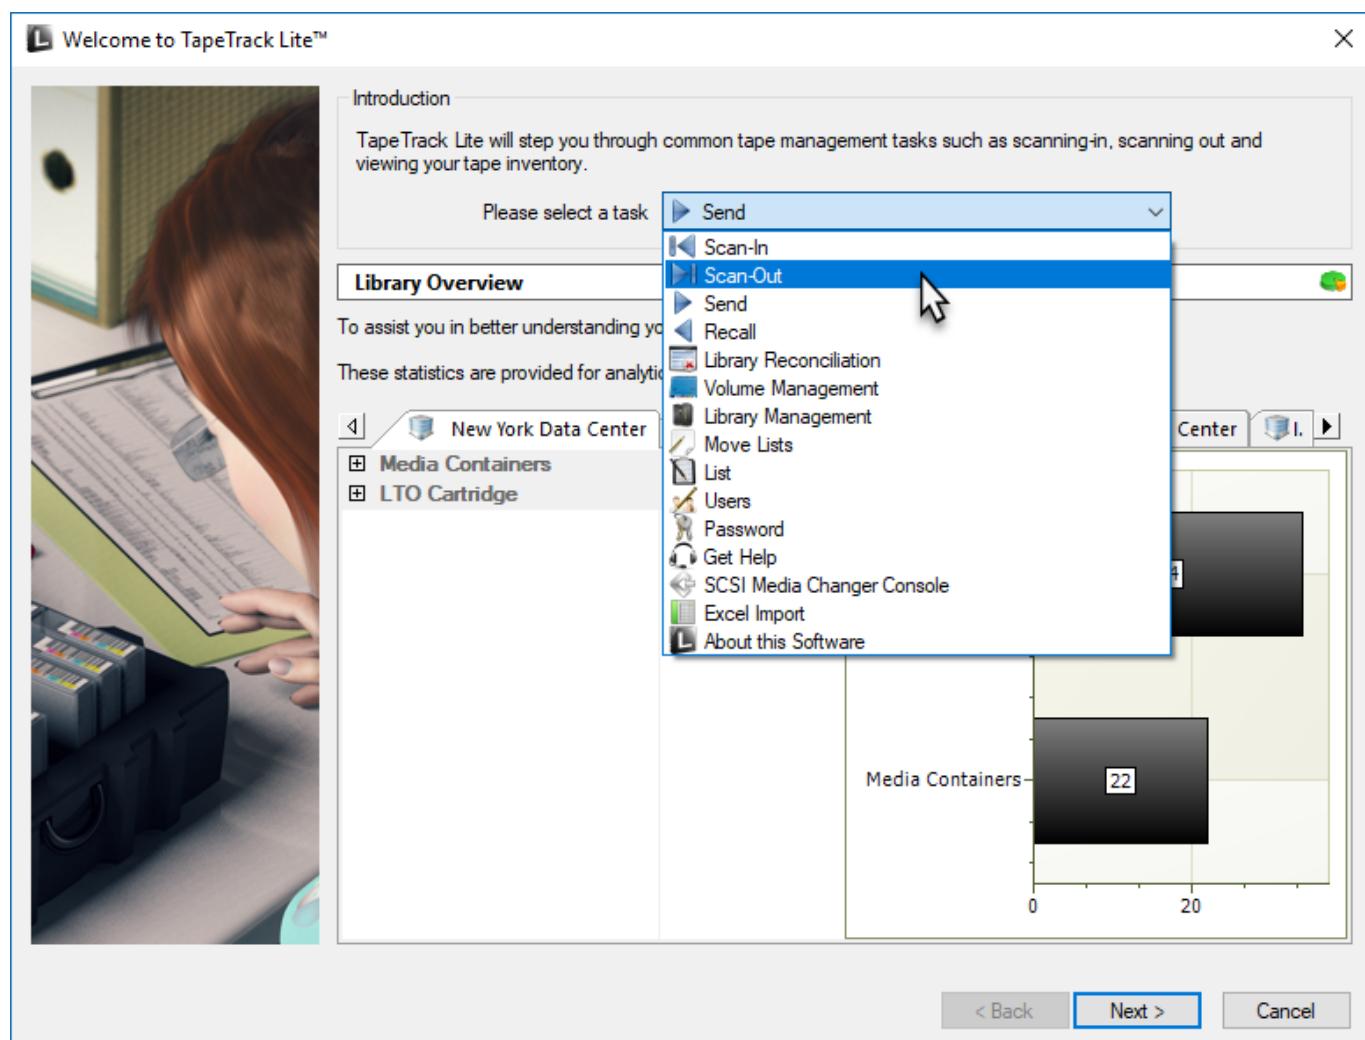

The TapeTrack Lite Scan-Out function allows you to place Volumes in a move status from their Current Repository to a Target Repository.

When a Volume is put into a move status this only represents the request to move the Volume and a second step is required to confirm the movement of the Volume when it arrives at the Target Repository.

Scan-Out Process

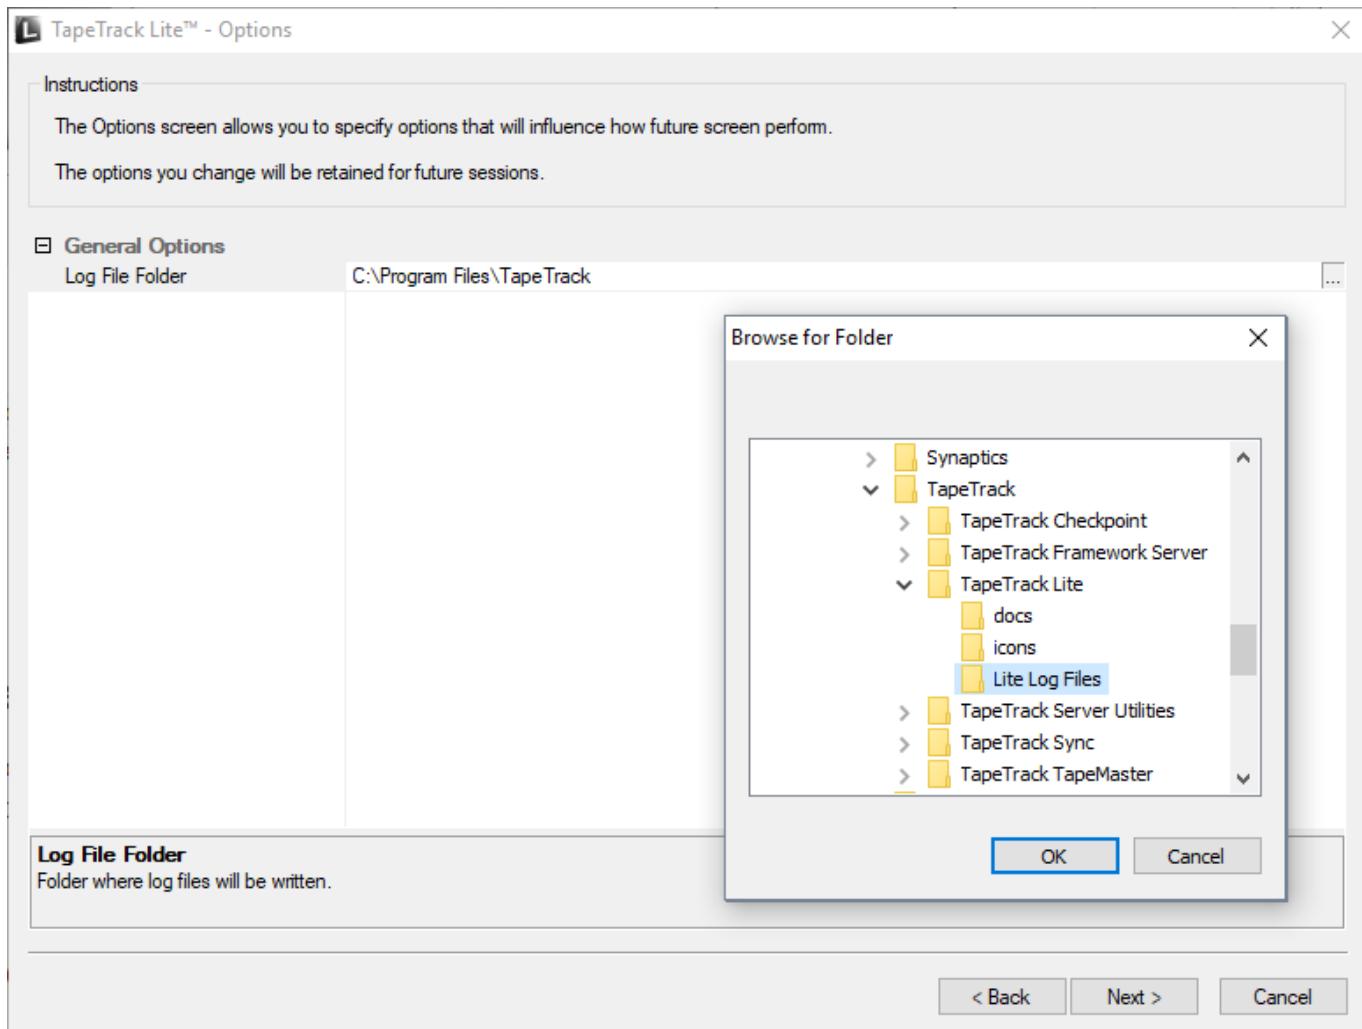

Selecting Scan-Out

Select Scan-Out from the drop-down task menu.

Options

This will open the Options window. If required you can set the location for the log files to be written to, or leave the default. To change the default directory, click in the right of the Log File Folder and click on the more options button (...) and select the preferred directory.

Click Next button to continue.

Customer Selection

Select the account or customer that you want to manage tapes for by double-clicking the [Customer-ID](#) or left-clicking the [Customer-ID](#) and clicking Next at the bottom of the page.

TapeTrack Lite™ - Customer Selection

Instructions

The Customer Selection screen allows you to select one TapeTrack Customer that will be the subject of operations in subsequent screens.

You may select a Customer by double clicking the Customer, or by clicking the Customer and pressing the Next button.

Customer	Volumes	Moves
New York Data Center	56	0
Los Angeles Data Center	23	7
North Carolina Data Center	56	23
Nashville Data Center	52	9
	187	39

Remember previously selected Customer

Scan-Out Location

In the Scan-Out Location window select a Repository to Scan-Out the Volumes from by double-clicking on the Repository or left-click to select Repository and click Next to proceed.

TapeTrack Lite™ - Scan-Out Location Selection

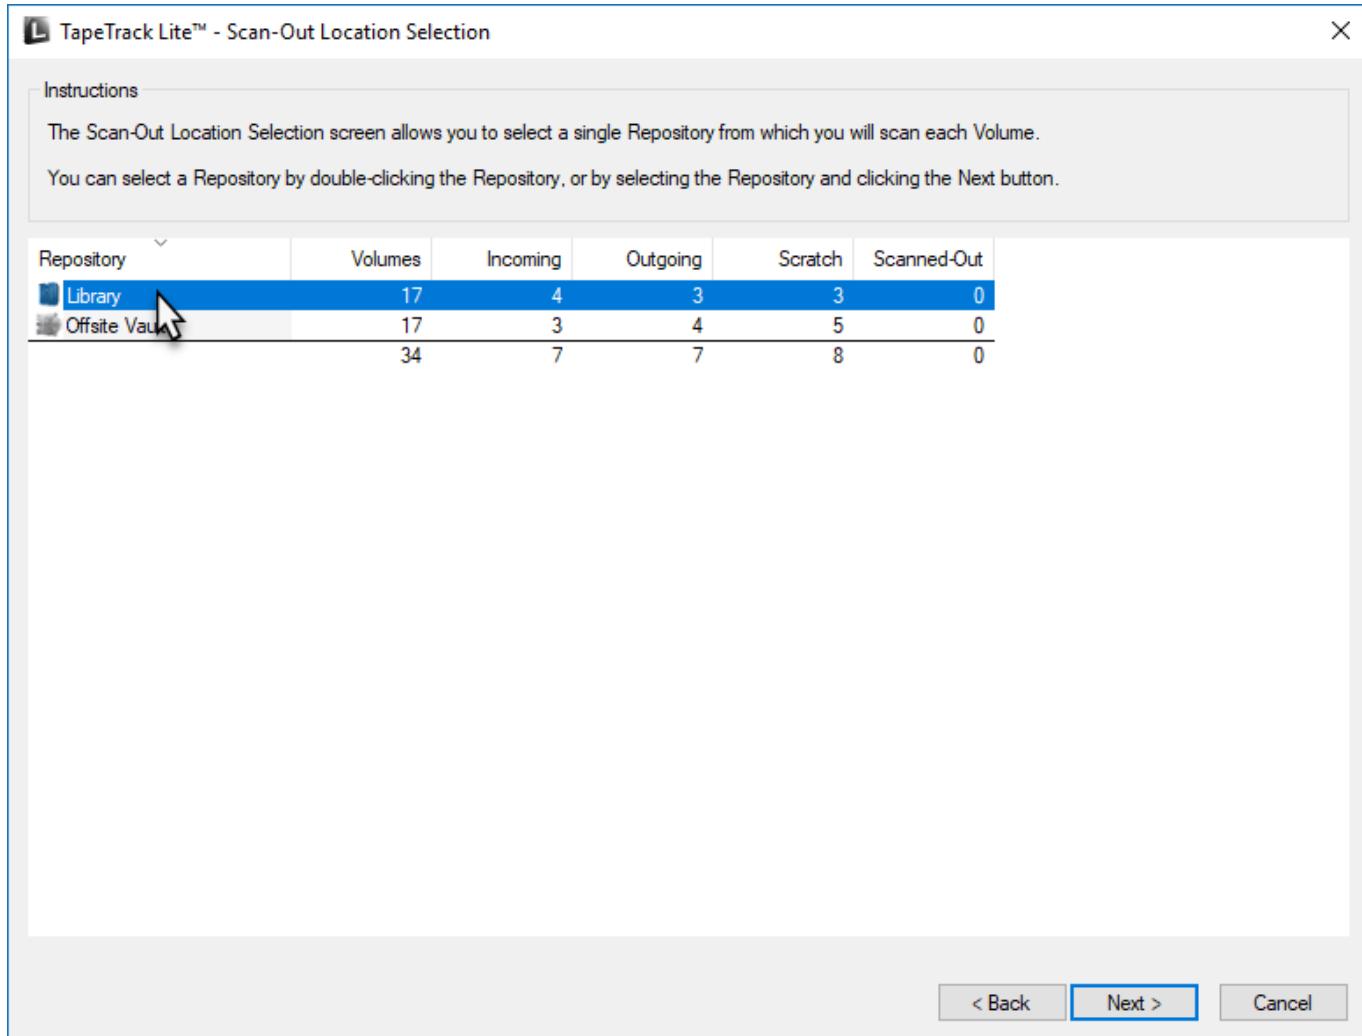

Instructions

The Scan-Out Location Selection screen allows you to select a single Repository from which you will scan each Volume.

You can select a Repository by double-clicking the Repository, or by selecting the Repository and clicking the Next button.

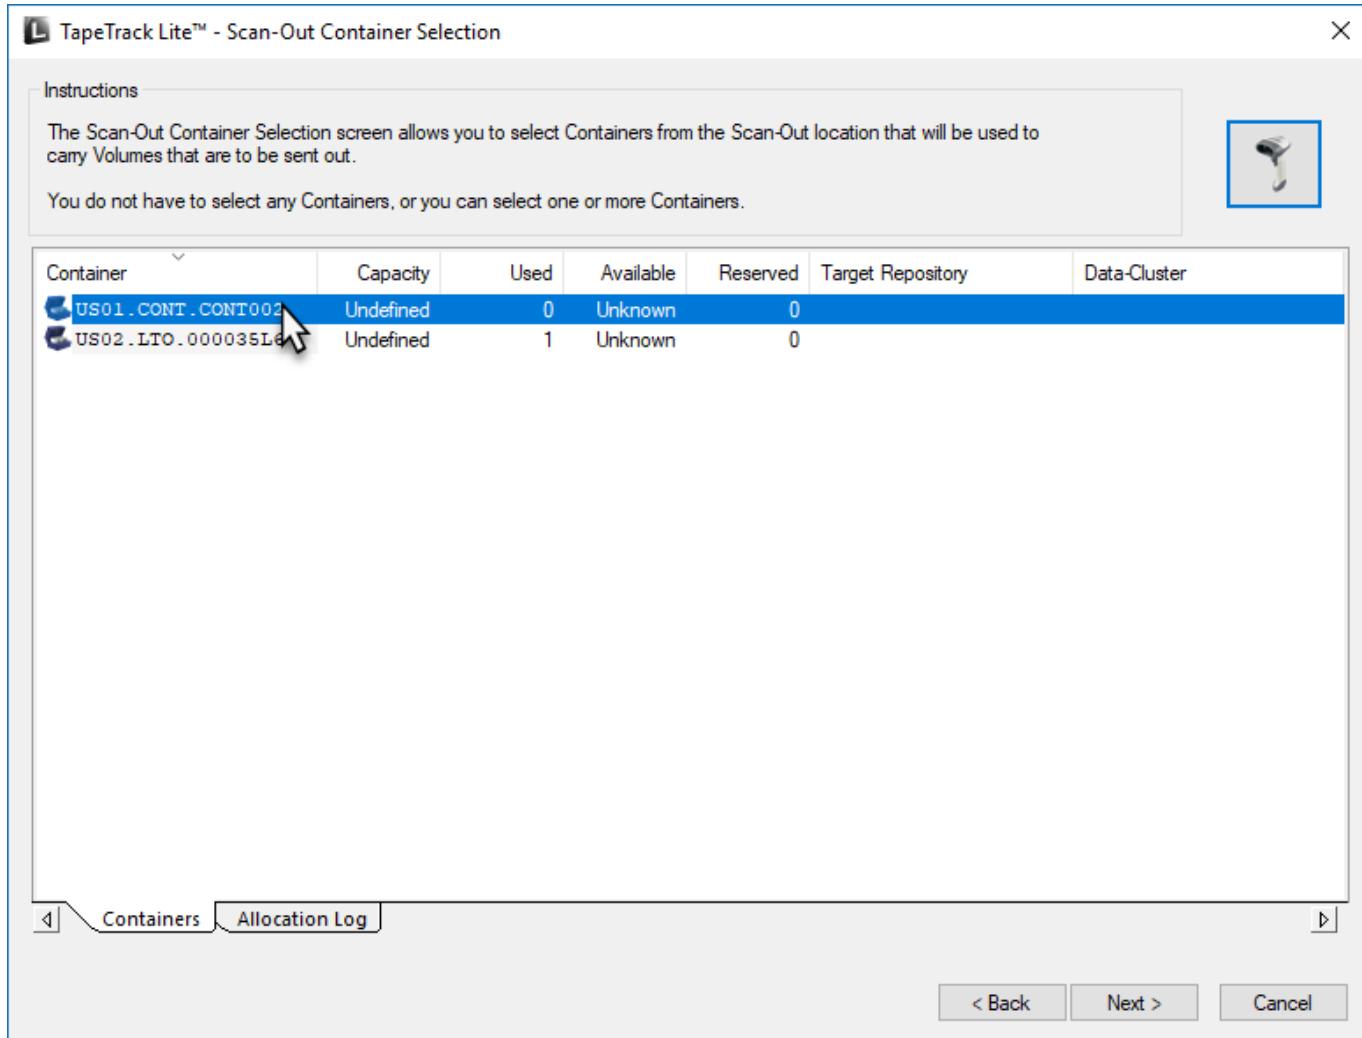

Repository	Volumes	Incoming	Outgoing	Scratch	Scanned-Out
Library	17	4	3	3	0
Offsite Vault	17	3	4	5	0
	34	7	7	8	0

< Back **Next >** **Cancel**

Scan-Out Container Location

Select one container by double-clicking or by left-clicking Container ID and clicking Next. To select multiple Containers control + left-click to select required choices. Containers can also be Scanned-In by clicking the Open Volume Scan-In window by clicking on Scan-in Button which will launch the [Desktop Scan Window](#) and scanning required Containers. If no Containers are needed simply click Next.

Scan-Out Volumes

The Scan-Out [Volumes](#) window will display the tapes eligible for Scanning-Out of the selected Customer and Repository. This window also, by default, opens the Scan-Out Volumes input window. Customer-ID and Media-ID values can be entered in the upper right Defaults panel to automatically add these values to the scanned barcodes if scanning unqualified barcodes. The field Edit in the Defaults panel can be used to add prefix or suffixes to the [Volume-ID](#).

For example, setting the Customer-ID field to US01, Media-ID field to LTO and edit field to *L5 will change a barcode of 123456 to US01.LTO.123456L5.

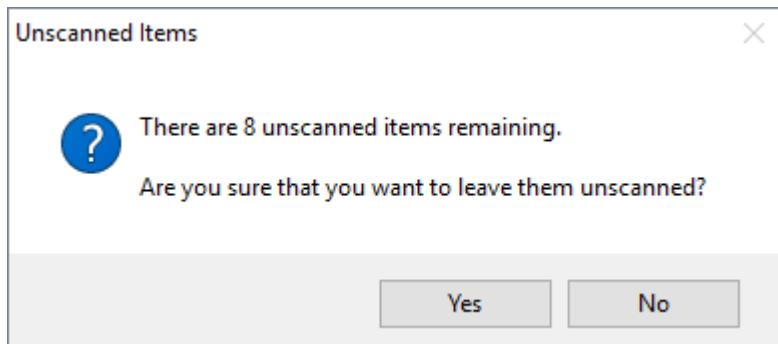

The screenshot shows the 'Scan-Out Volumes' window in TapeTrack Lite. At the top, there are dropdown menus for 'Customer' (set to 'US01') and 'From Repository' (set to 'LIBR'), and buttons for 'New York Data Center' and 'Library'. The main area contains a table with columns 'Volume', 'To', 'Container', and 'Data-Cluster'. The 'To' column shows 'Offsite Vault' for all 13 volumes listed. The 'Container' column shows 'No-Container' for all. The 'Data-Cluster' column is empty. To the right of the table is a 'Scanned Items' tree view, which is empty (labeled B). At the bottom, there are tabs for 'Scan-In List (13)' and 'Scan-Out Log' (labeled D), and buttons for '< Back', 'Next >', and 'Cancel'.

Notes:

- **A** The Scan-Out window shows the items that need to be scanned.
- **B** The scanned item tree shows the items that have been scanned and associated Containers.
- **C** The Scanner button allows you to reiterate the Scanner Window.
- **D** The Scan-Out Log option lists any errors in scanned Volumes.

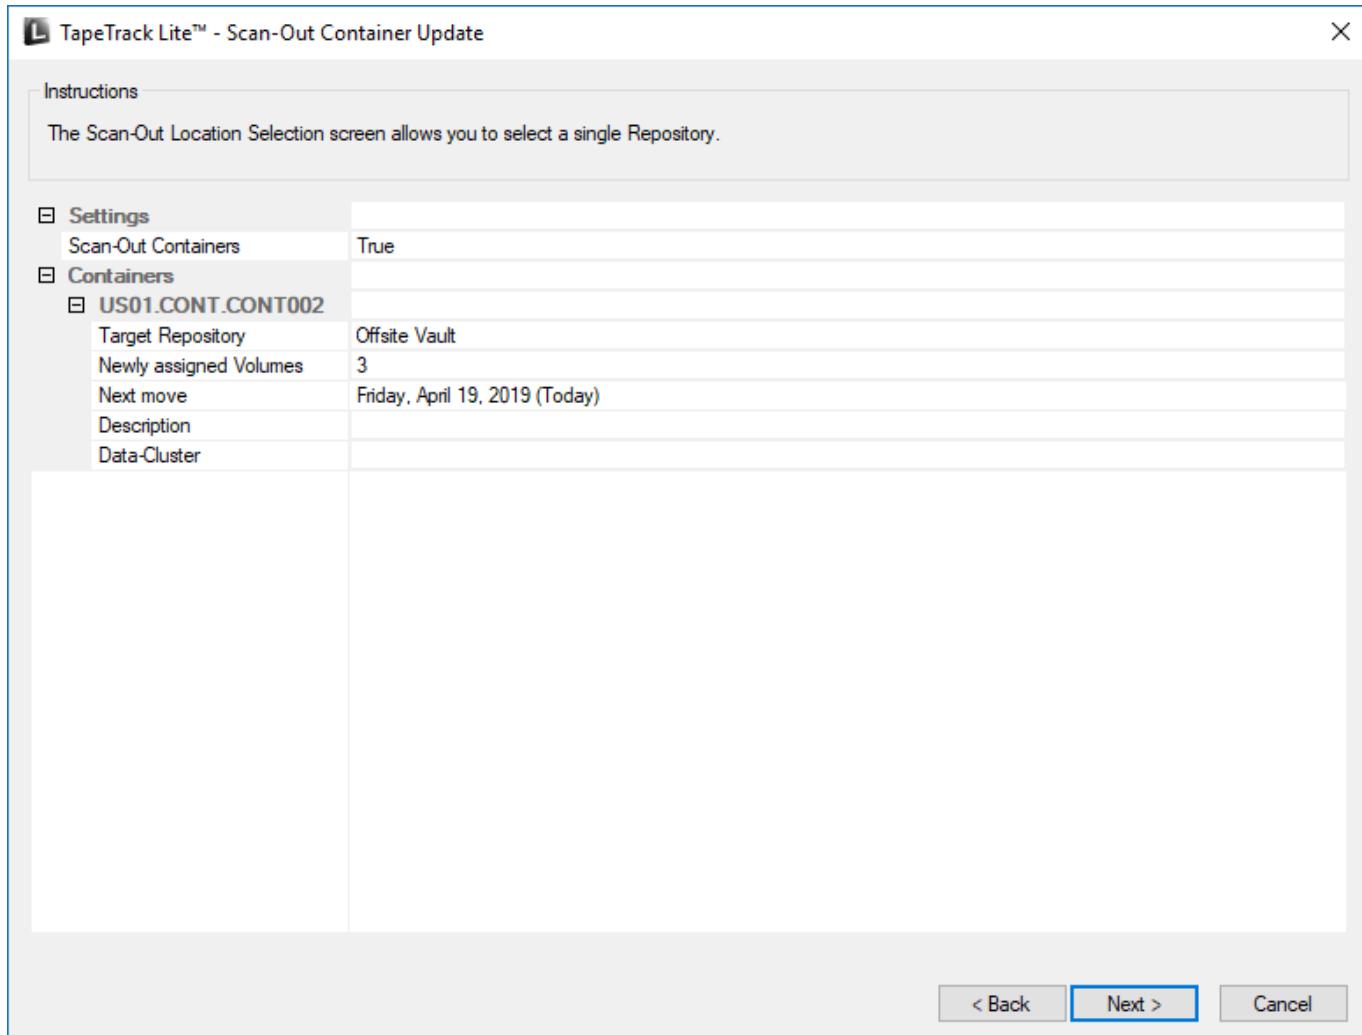

Scan-Out the required Volumes using your preferred [scanning method](#).

When finished scanning out Volumes click Next to continue. If you have not Scanned-Out the entire list a warning of Unscanned Items will be displayed. If you wish to Scan-Out the rest of the Volumes click No to return to the Scan-Out Volumes window. If you wish to continue and leave the remaining Volumes unscanned (they can be scanned out at a future time) click Yes to continue.

Scan-Out Container Update

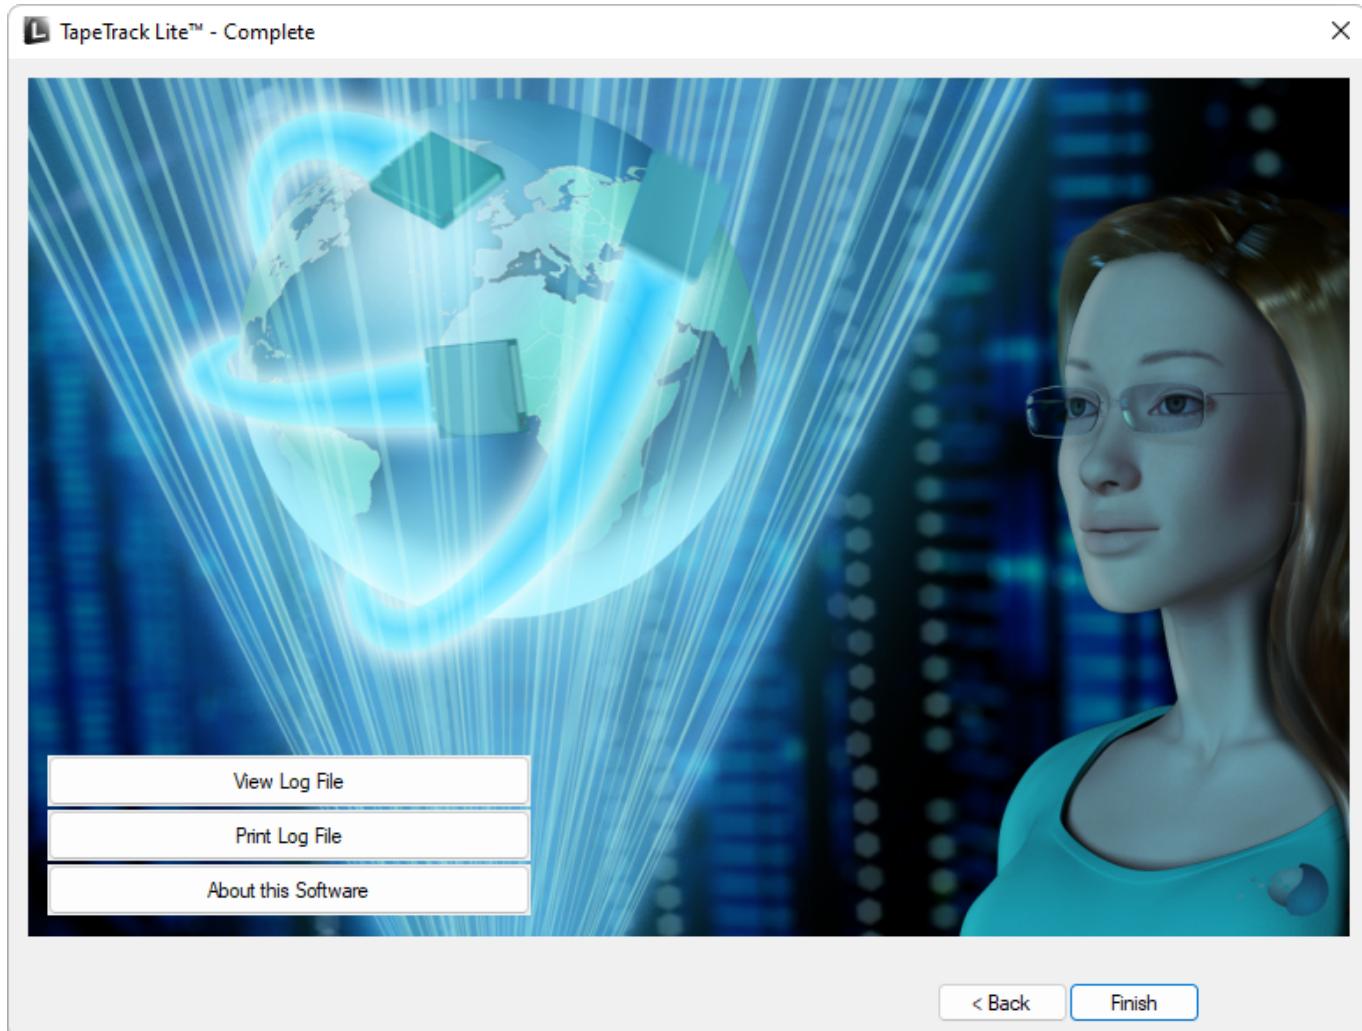

From here you can set the next move date and add description s for the Container/s.

Complete

This will bring up the Complete window, from here you can

- Click Finish, Cancel or X to exit TapeTrack Lite
