

Send

The TapeTrack Lite Send function is used to select [Volumes](#) that reside in one location for the purpose of putting the [Volumes](#) into a Move status to another location or [Repository](#).

When a [Volume](#) is put into a Move status this only represents the request to move the [Volume](#) and a second step is required to Confirm the movement of the [Volume](#).

In addition to putting each [Volume](#) into a Move status, the Send function also allows you to set values such as:

1. A [Next Move Date](#) which will influence when a [Volume](#) returns to you.
2. A Description of the [Volume](#) .
3. A Time Threshold which will raise an alert if the [Volume](#) is not Scanned-In at the next location or [Repository](#).
4. A [Data Cluster](#) which can be used to automatically determine the [Next Move Date](#), using a [Simple Management Rule](#).

Send Volumes Process

Select Send

Select Send from the **Task Menu**.

Welcome to TapeTrack Lite™

Introduction

TapeTrack Lite will step you through common tape management tasks such as scanning-in, scanning out and viewing your tape inventory.

Please select a task

Library Overview

To assist you in better understanding your library, below are the statistics for each account.

These statistics are provided for analytical purposes only.

Container

LTO Cartridge

Category	Count	Moving
LTO Cartridge	101	1
Container	1	1

< Back Next > Cancel

Options

Notes:

- **A** If required you can set the location for the log files to be written to, or leave the default. To change the default directory, click in the field to the right of the Log File Folder, click on the more options button (...) and select the preferred directory.
- **B** Under Advanced Options:
 - Set the time deadline before a **Volume** will be marked as overdue at its Target **Repository**.
 - The date for the **Volumes** Next Move.
 - List of pre-defined **Volumes** .
To add additional lists, create new files in the install directory that match the pattern List-*.txt.

Scanning to select Containers

If the **Volumes** you are sending are in Barcoded Containers, scan the Container before scanning the **Volumes**.

If required scan subsequent Containers, as needed, before scanning the **Volume** to be assigned to them.

If your Container has a unqualified Barcode, be sure to edit the **Customer-ID** and **Media-ID** fields at the top right of the **Scan to add Volumes** window for each Container and subsequently scanned **Volumes**

Scanning to add Volumes

This opens the **Scan and Modify** window which, by default, opens the **Scan To Add Volumes** window.

Scan out the required **Volumes** using your preferred **scanning method**.

When all **Volumes** are scanned-in, close the **Scan To Add Volumes** window by clicking X at top right of window.

Displaying Volumes

This sets focus to the **Scan And Modify** window.

All **Volumes** previously scanned in are displayed in the main pane of the window. Recognized **Volumes** are displayed with black font on white background. Unrecognized **Volumes** are displayed with white font on a red background.

Left-clicking on any **Volume-ID** will display that **Medias** Identity, disposition and Attributes.

To alter current settings on a **Volume** select required **Volume/s** on the left pane in in the window. Change any Attribute on that **Volume** by clicking in Attribute window and selecting required value.

Notes:

- **A** Customer-ID, Media Type, Volume-ID
- **B** Status (Known or unknown), Target Repository, Next move date, Time threshold and Data Cluster
- **C** The Volumes Description

Multiple Volumes can be edited as a group using the Quick Edit tab. Select a Volume and set Next Move Date, Description and/or Data Cluster.

TapeTrack Lite™ - Scan and Modify (6)

Instructions
This screen allows you to scan tapes and containers and then update information on each item.
To update any of the scanned items just click on them in the tree. You can also drag-and-drop tapes between containers.

Volume	Next move	Description	Data Cluster

Item Tree Quick Edit

< Back Next > Cancel

Right-click the modified **Volume** and select Edit → Copy and the appropriate value from the options.

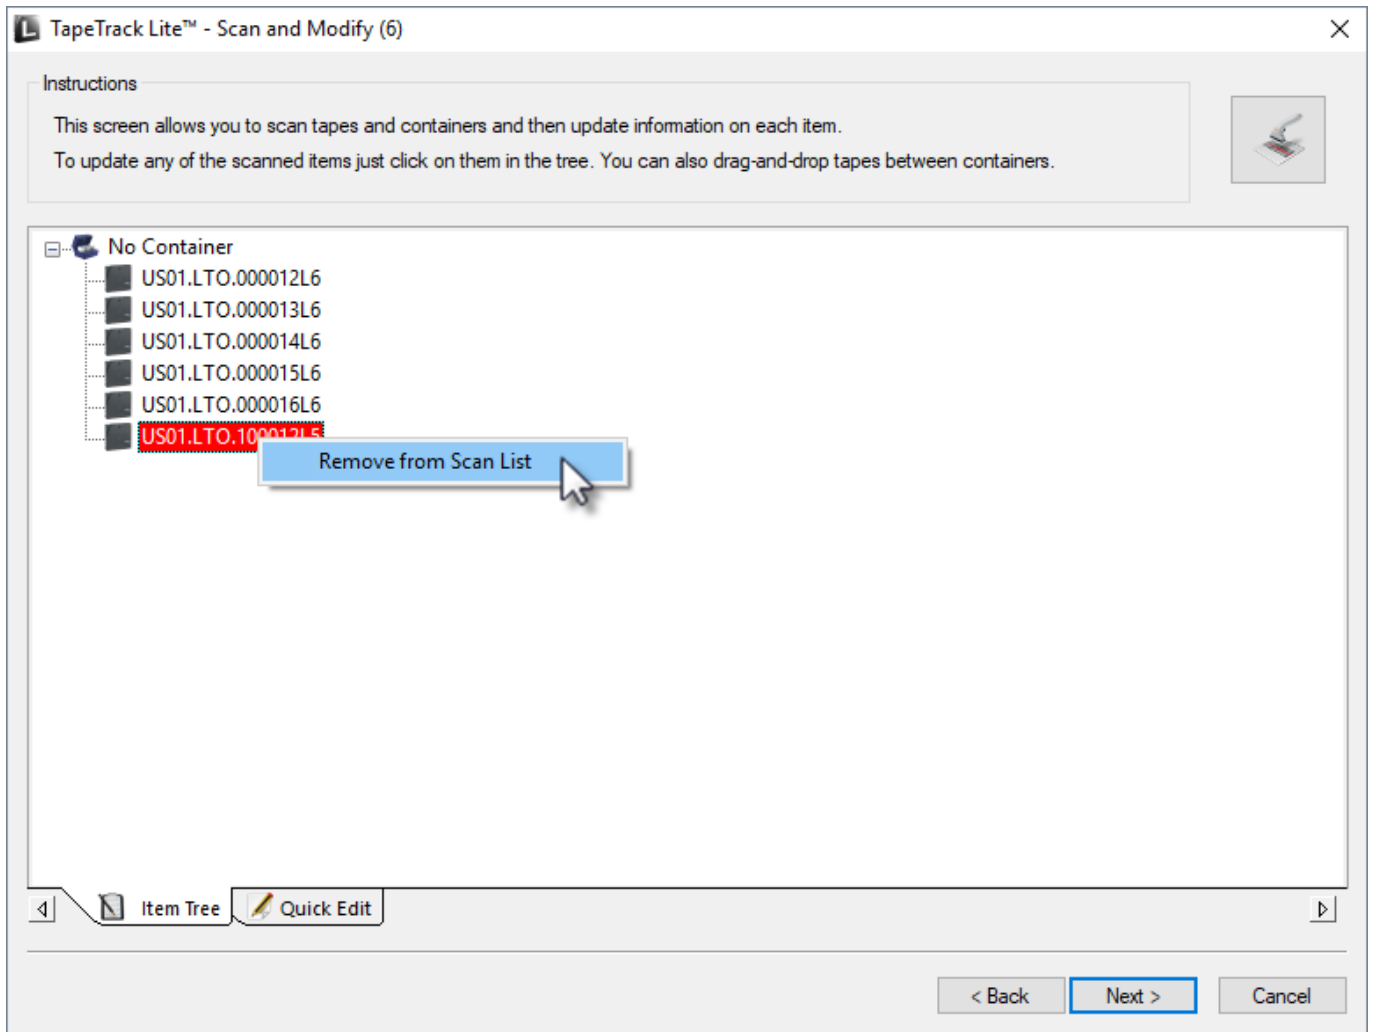

Select **Volumes** to apply the data to and right-click and select Edit → Paste and the appropriate value from the options.

After modifying **Volume** information to required values click Next button to continue.

If you have any unknown **Volumes** you will be prompted to add them before continuing. To add new **Media** successfully all fields associated with that **Volume** (**Customer-ID**, **Media type**, **Volume-ID** etc) must be applied.

If an unwanted **Volume** is scanned inadvertently it may be removed by right-clicking the **Volume** in the **Scan and Modify** window (Items tab) and selecting Remove from Scan List.

Click Next to continue.

Verifying Volumes

This will open the **Send Apply and Verify** window. This screen displays the final results of the Send operation including the **Volume-ID**, Current Repository, Target Repository next move date, **Volume Description** and request status.

Click Next to continue.

Instructions

This screen shows you the final results of your Send operation.
