

Upload and Download Files

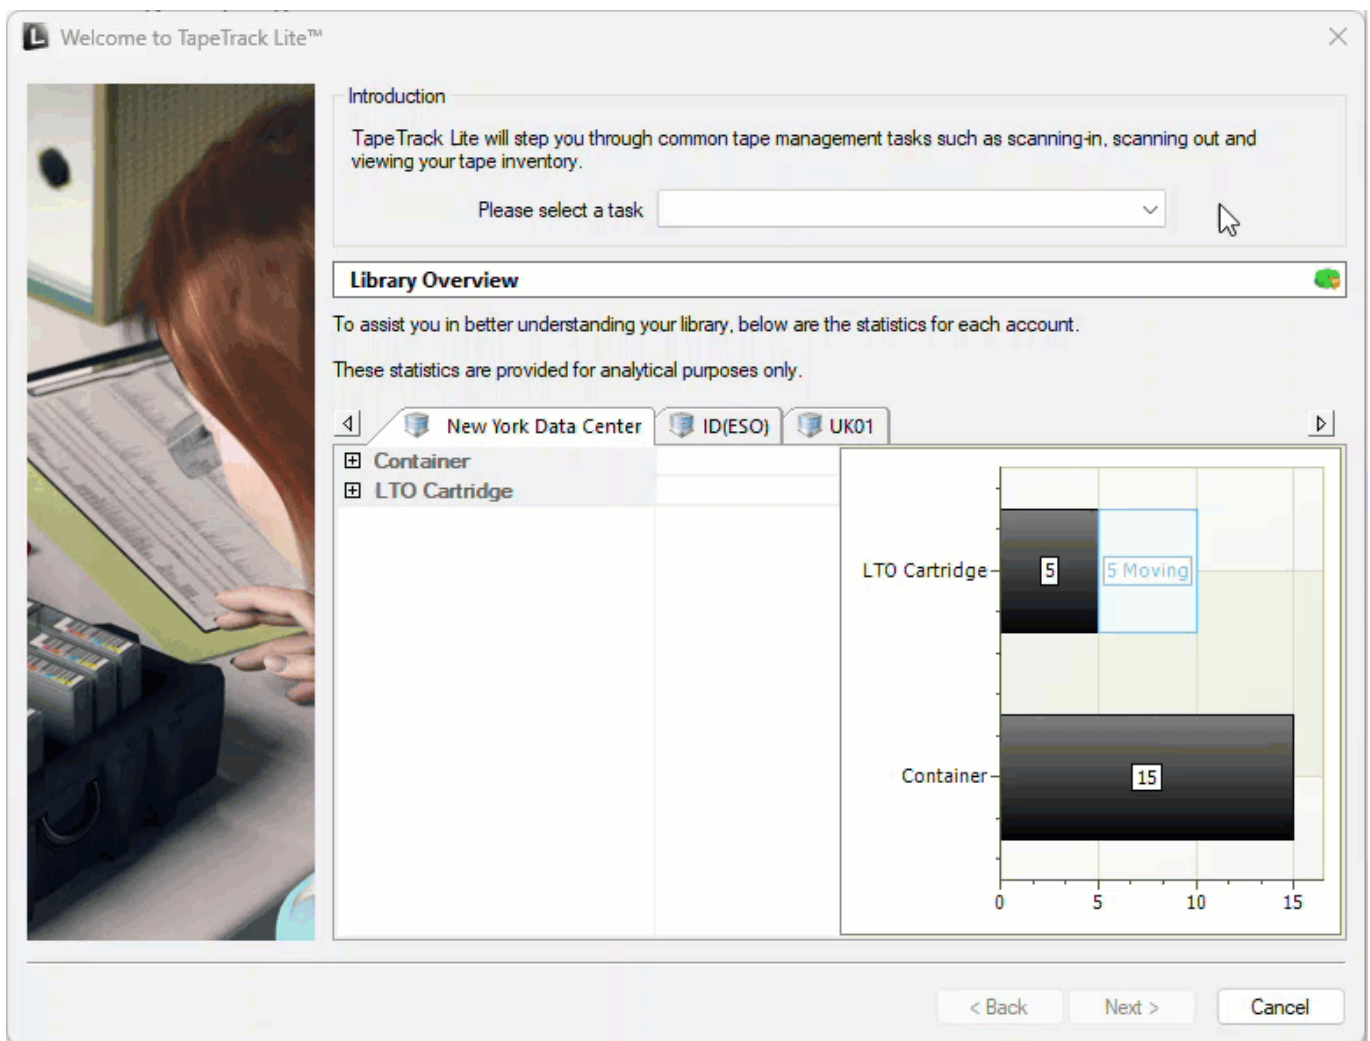

Prerequisites

Menu option **Upload and Download Files** needs to be enabled via the Lite config file

File Upload Process

Select Upload And Download File from the **Task Menu** and click Next to continue.

Options

This will open the **Options** window. If required you can change the location for the log files to be written to, or leave the default.

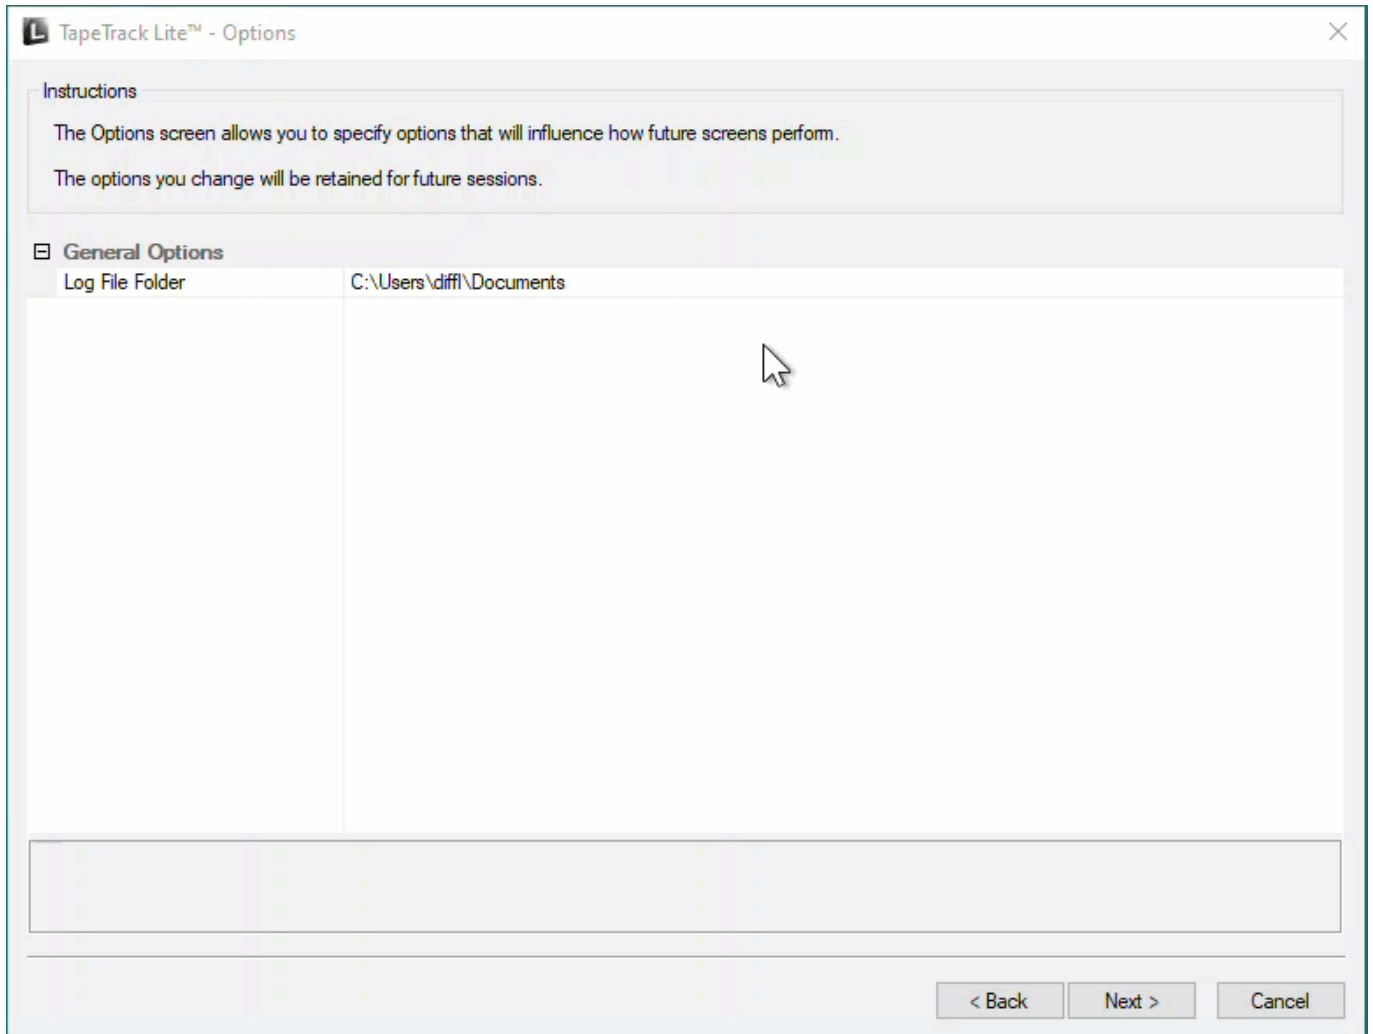

To change the default directory, click in the field to the right of the Log File Folder and click on the (...)

button, select the required directory and click OK to save.

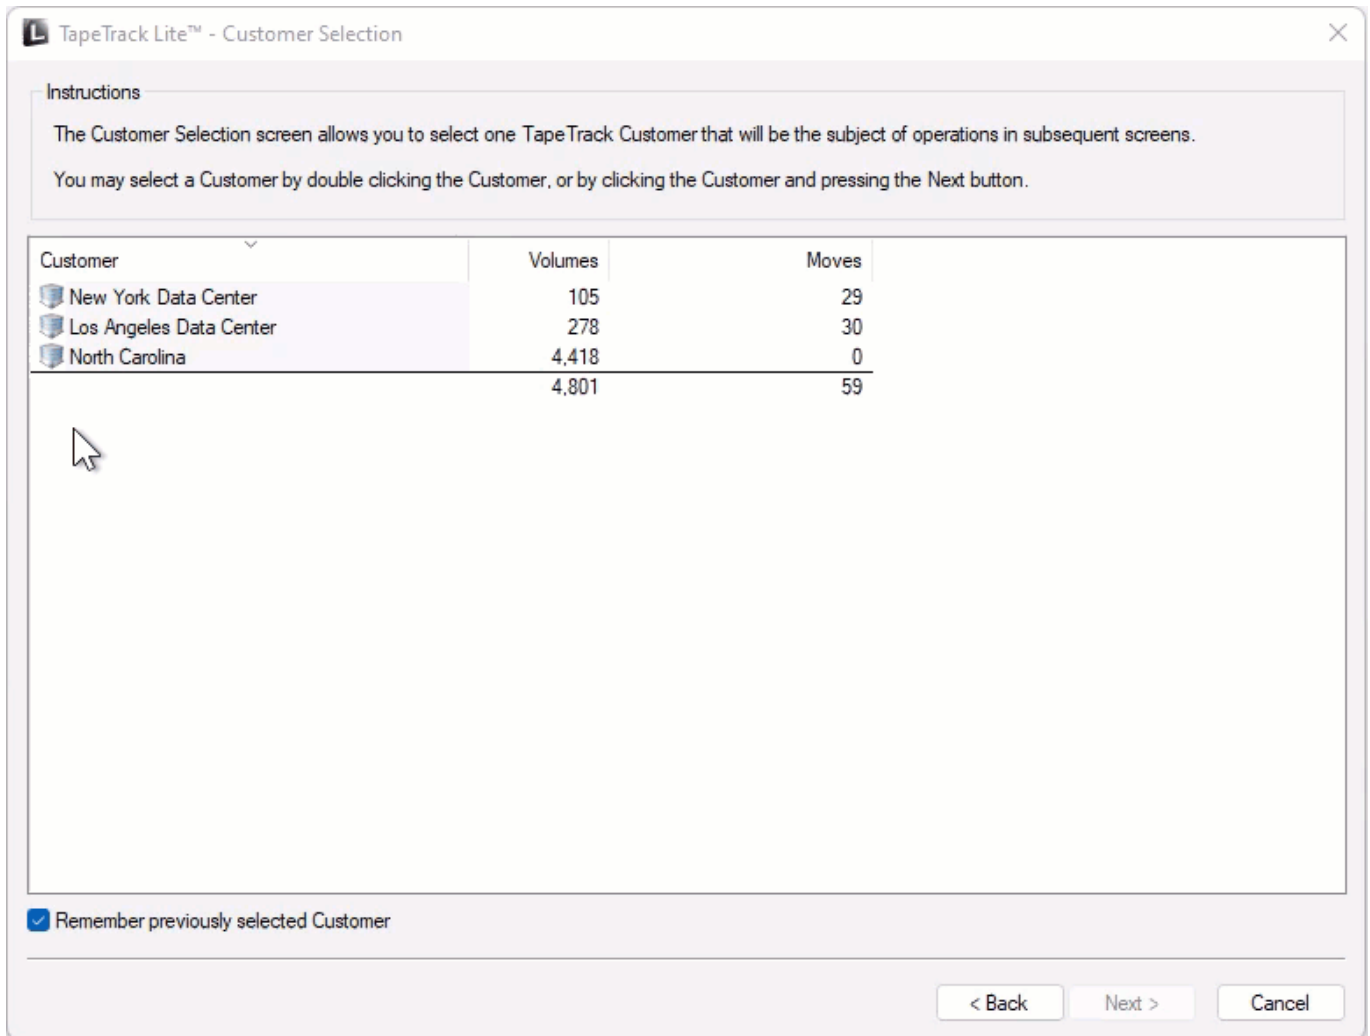

Setting the directory location in the Lite configuration file will skip this window and write the log file to that location.

Click Next to continue.

Customer Selection

Select the **Customer or account** that you want to manage tapes for by double-clicking the **Customer-ID** or left-clicking the **Customer - ID** and clicking Next at the bottom of the window to continue.

Darg selected file from Windows Explorer and drop in the main window.

TapeTrack Lite™ - File Control

Instructions

The File Control Screen allows you to upload files to your TapeTrack Server.

To upload the files you can simply drag-and-drop them into the window below.

You can also automate this process using the TMSS10UploadFiles command line program.
