

Getting Started

This section is designed to get you up and running with the basic functionality of TapeTrack Lite as quickly and easily as possible.

This may be enough for you moving forward, but should you require documentation on more advanced aspects of the product, please see the [Advanced Usage](#) section.

Prerequisites

TapeTrack Lite

TapeTrack Lite must be installed and functional.

Configuring a Server

TapeTrack Lite requires that you have a [connection to a TapeTrack Framework Server](#). This Server may be running in your own company, or it may be provided by your offsite vendor.

When you start TapeTrack Lite, if you have no existing Servers defined you will be asked to [configure a server connection](#).

For details on entering Server information please see the [Adding a Desktop Server Connection](#) page.

If you are connecting to a TapeTrack Service on the Internet, you may need to make some allowances in your firewall. For details see the [Firewall Considerations](#) section.

Logging on

Each time you start TapeTrack Lite you will be asked to enter credentials (a [User-ID](#) and [Password](#)).

Without these credentials, you will not be able to use the software.

For detailed information on entering credentials, please see the [Desktop Logon](#) page.

Basic Functions

- [Scan-In](#)

- [Scan-Out](#)
- [Send](#)
- [Recall](#)
