

Adjusting Slot Allocation

From time to time you may need to adjust a customer's slot allocation based on increased or decreased volume numbers.

Increasing Slot Allocation

Documentation coming

Decreasing Slot Allocation

Removing Empty Slots

Decreasing slot allocation for a customer can be as simple as reducing the slots allocated through the slot **Edit Range Information** window, as long as the slots being removed are sequential and unoccupied.

Removing Occupied Slots

If the slots to be removed from allocation are currently occupied, completely or partially, the volumes will need to be reslotted before this can be accomplished.

You must have enough empty slots under the highwater mark to accommodate any volumes currently slotted above the mark

To remove these volumes from the occupied slots:

- Right click the required repository and select **Properties**, or double click the repository, and click on the **Options** tab.
- Set **Highwater Offset** to the number you wish to lower slot allocation by. For example if you currently have 3000 slots allocated and wish to reduce the allocation to 1000 slots set the highwater offset to 2000 (3000 - 2000).

Edit Repository: Offsite Vault

Identity	Zones	Slot Usage	Options	Usage History	Movement History	Certification
Allow Deletes			False			
Allow Overlaps			False			
De-assign from Container			False			
Empty Container			False			
Do not slot if Container			False			
Do not slot			False			
Require Tag			False			
Require Tag Reset			False			
No re-move			False			
Disallow backward next move date changes			False			
Reset Data Cluster			False			
Confirm Container Contents			False			
Move Container Contents			False			
Late Threshold			0			
Highwater Offset			2000			
Movement Mode			None			
Next Repository			Library			
Enable Slotting			True			

- Run the slotting program TMSS10SlotAllocation to re-slot any volumes above the highwater mark
- Decrease the [slot allocation](#).
- Adjust the **highwater mark** back to zero to enable use of all allocated slots.
