

Overview

The message list allows administrators to broadcast messages to users which display when they login. These messages also can be configured with general responses to gain quick feedback from Users

Message List

To access the message list click Administration → Message List from the main menu.

Right-Click Operations

Right-clicking in the Message List provides three operations:

- **Properties:** Launches the Edit Message Window. This can also be done by double-clicking on a message.
- **Add:** Launches the New Message Window. This can also be done by hitting the Insert key on the keyboard.
- **Refresh:** Refreshes the Message List to display the most up-to-date information. This can also be done by hitting the F5 key on the keyboard.

Adding a New Message

To add a new message to the **Message List**:

Right-click in the Message List and select Add or hit the Insert key on the keyboard.

The **New Message** window is comprised of four modifiable fields:

- **Subject:** The title of the message.
- **Response Type:** Adds “Yes”, “No”, “Maybe”, and/or “Contact Me” buttons to the bottom of the message.
- **Expiry:** The date when the message should expire and no longer display.
- **Message:** The body of the message to be sent.

Broadcasting to Users, Viewing User Responses, and Editing Messages

To launch the Edit Message window, double-click a message in the Message List or right-click a message and select “Properties”. [image](#) The Edit Message window is very similar to the New Message window, except a Selected Users tab has been added. The Selected Users tab displays information on which Users have responded to the message and what their responses were. To select which Users

will receive the message, select their User-IDs and hit the Spacebar. Once a User is selected, the message will display on startup:
