

# Server Options

## Overview

The Server Options allow global settings for Customer, Data Clusters and Simple Management Rules in one location.

## Server Options

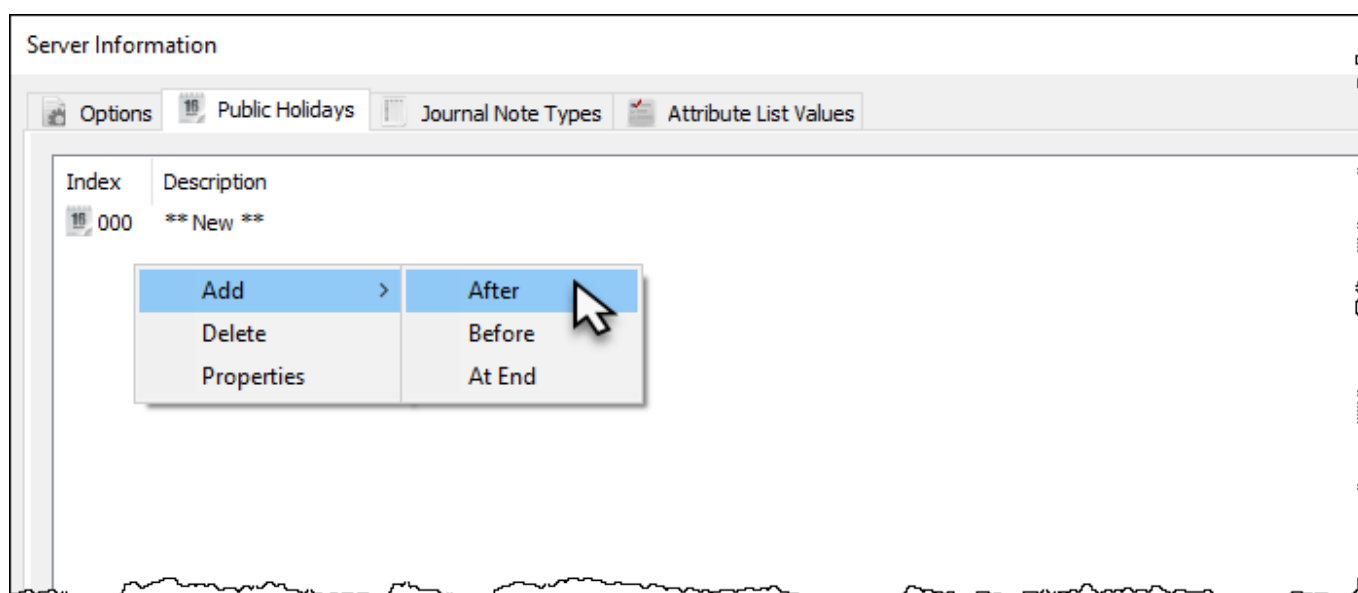

### Options

Options tab allows entry for:

- Extension Characters or additional characters that can be used in identifiers such as Data Clusters
- Customer-ID Filter. Set acceptable customer ID filters to enforce format rules. e.g. ???? will force all customer ID's to be four characters.
- Friday Weekend. Setting to true will start the weekend on Friday, false will start the weekend on Saturday.
- Active Directory Group that is checked to ensure user can logon. If left empty the group 'TapeTrack Users' will be checked if the user profile enables that option.
- Volume Stages. A list of volume stages, delimited by semicolons. e.g. Ordered;Used;Destroyed

### Public Holidays

### Holiday Details

Properties

Description:

Enable

Scope

Holiday Group Filter:

Seq.	Date	Description
1	2017-01-02	New Years Day
