Server Statistics

Overview

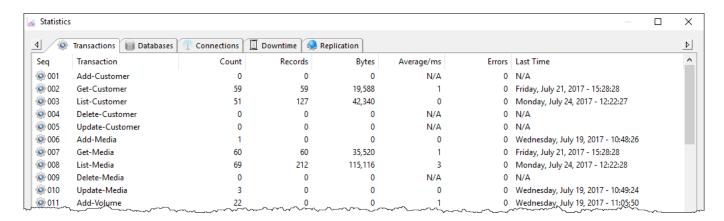

Server statistics displays a list of processes or commands between TapeTrack software and the FrameWork Server.

Server Statistics

the Server Statistics window displays a list of transactions between the users Tapetrack software, such as TapeMaster or Lite, and the FrameWork Server Database. The information includes:

Transactions

- Transaction description
- Number of times that transaction type has been executed
- Number of records accessed with that type of transaction
- Bytes transmitted
- Average transaction time
- Error count
- · Last time transaction executed

Databases

- Database file accessed
- Database file description
- Database file size
- Unique keys
- Total keys
- Type
- Recreatable

Connections

Last update: 2025/01/21 22:07

- IP address used to connect to database
- Number of connections from this IP address
- Time and date of last connection
- Time and date of first connection
- Percentage of total connection time

Downtime

- Date and time of server going offline
- Date and time of server coming back online
- Duration of time server was offline

Replication

- Statistics of replicated server messages, failed connections and dropped connections
- · Replication server details
