

# Server Statistics

## Overview

Server statistics displays a list of processes or commands between TapeTrack software and the FrameWork Server.

## Server Statistics

The Server Statistics window displays a list of transactions between the users Tapetrack software, such as TapeMaster or Lite, and the FrameWork Server Database. The information includes:

### Transactions

- Transaction description
- Number of times that transaction type has been executed
- Number of records accessed with that type of transaction
- Bytes transmitted
- Average transaction time
- Error count
- Last time transaction executed

The screenshot shows a window titled "Statistics" with a tabbed interface. The "Transactions" tab is selected. The table below lists various transactions with their counts, records, bytes, average times, error counts, and last execution times.
