In the Stock Properties window:

- Description
  - Insert a descriptive name for the Stock Control Rule, e.g. for all US Customers and LTO4 Volumes US LTO 4

- Filters
  - Customer: Add filter to select Customer-IDs that will use this rule. e.g. For all US Customers US*
  - Media: Add Media Type this rule applies to. e.g. LTO
  - Volume: Add Volume Filters to enforce correct Volume-ID association. e.g. For a 8 character ID ending in L4 use **?????L4**.
- Totals
  - Minimum Count: Insert minimum Stock Number before you are alerted of low stock levels (alert is a future enhancement).
  - Current Total: Current total of Volumes in Stock (display only).
- Options
  - Enabled: Set Enabled to True to make Rule active.

Click OK once all data is correct and complete.

Customer Media Settings

In the TapeTrack TapeMaster Customer Tree, right-click the Media Type on the Customer you want to apply Stock Control to and select Properties.

Change Stock Controlled to True.

If Auto Stock Selection is set to False, all new Volumes must be added through the Stock Control window. If set to True Volumes may be added directly from the inventory window in TapeTrack TapeMaster.

Scan To Assign Volumes

To add new volumes, from the stock control window, open the rule you want to assign the new Volume-ID's to. Click on the Scan to Assign button to open the scan in window. Scan the new volume Barcode/s as required.

Stock Properties										×
Description Filters Customer Media Volume Totals Minimum Count Current Total Options Enabled	LTO Stock							10 10 Defaults Customer-ID	US02	3 ₁ 0.02
	0 20 Tr Barcode m 10001214	Customer Media	ti Media Type Volume1D Message				E C	Options Save Defaults T Enable Sounds F Edt	True False False	0.03 0.04
	🕘 🔌 Mes	isages (1)								
		List contains	17 records							
		Ado	d Stock	Stock Adjustment		Scan to Assign	1			OK 4 Cancel

Barcodes that match the Volume-ID filter will be added to the default repository for that customer's media type.

If the scanned Barcode is outside the parameters of the Volume-ID filter, you will receive the message

Volume does not match the filters for the assigned Stock-ID and the volume will not be added.

Any attempts to add volumes without current stock will give an error message of **Insufficient Stock** to allow Volume to be added.

Scan To Assign Volumes From TapeMaster Inventory Window

Volumes can be added directly from the customer inventory window in TapeMaster if the media options are set to allow this.

Right-click in the Inventory window and select Special Operations \rightarrow Scan \rightarrow Scan To Add Volumes to open the scan in window and scan in new Volume-ID's to the default repository.

To add volumes to the desired repository (other than default), right-click the target repository and select Scan \rightarrow To Add to open the scan in window. Scan the new volume/s and close the scan window when complete.
