

# Overview

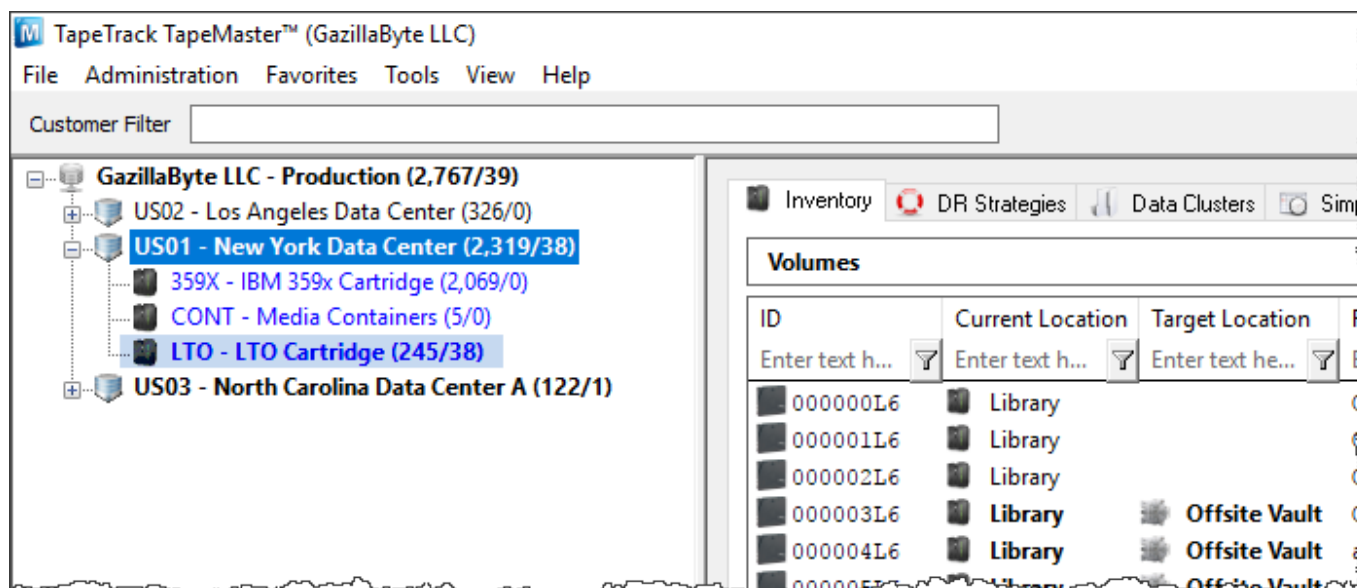

A Zone is a specific location where Volumes can be Slotted. Most commonly, Zones are shelving units, cabinets, or high-density storage drawers.

You must [create a zone](#) before it can be applied to a repository.

## Associating a Zone with a Repository

Once Zones are set in Zone Administration, they must be added to the appropriate Repository.

Select the Customer and Media type that the zone/s will be applied to.

## Slotting

Slotting can be done manually or automatically. For more information, see [Slotting](#).
