

Creating A Zone

Setting up a zone's parameters allows TapeTrack to give you the specific zone, shelf and slot address to efficiently store and pick volumes.

Creating A Zone

From the menu click Administration→Zone Administration.

Right click in the main window and select Add.

In the Identity tab add:

- Zone ID
- Zone description
- Total number of slots

- Number of slots per row
- Customer filter (optional)

The screenshot shows a 'New Zone' dialog box with the following fields:

- Index: 0
- Active:
- ID: GEMTRAC1
- Description: GemTrac Rack 1
- Slot Range: 1 to 450 = 450
- Slots/Level: 45
- Customer Filter: US03

Click OK to save.

Once created zones can be applied to a repository

Slotting

Slotting can be done manually or automatically. For more information, see [Slotting](#).
