

Creating A Zone

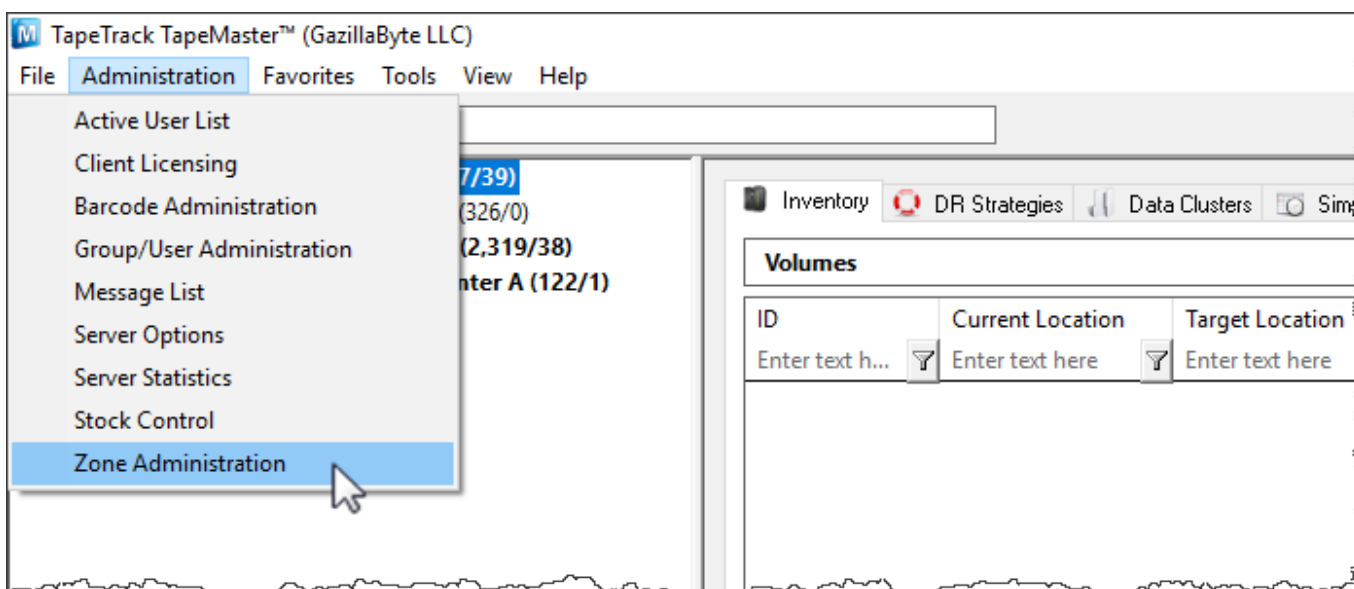

Overview

This section will explain to you how to create a Zone and also what each of the Zone properties represents.

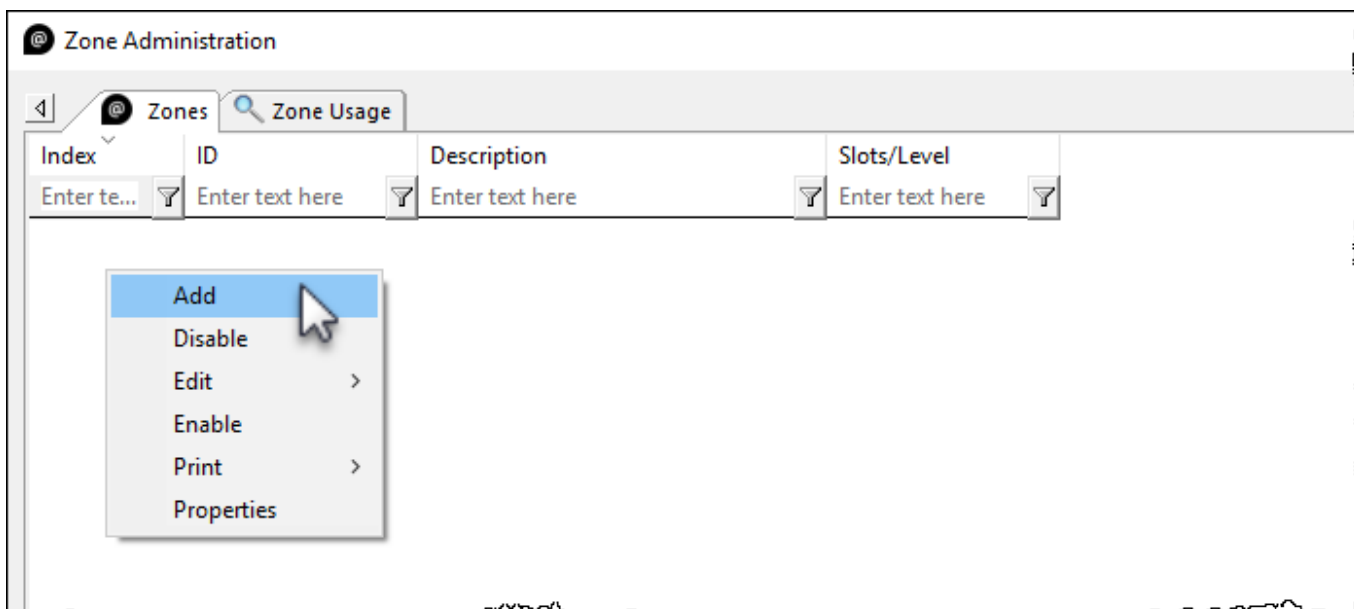

Setting up a zone's parameters allows TapeTrack to give you the specific zone, shelf and slot address to efficiently store and pick volumes.

Creating A Zone

From the menu click Administration→Zone Administration.

Right click in the main window and select Add.

In the Identity tab add:

- Zone ID
- Zone description
- Total number of slots
- Number of slots per row
- Customer filter (optional)

The screenshot shows a 'New Zone' dialog box with the following fields:

- Index: 0
- Active:
- ID: GEMTRAC1
- Description: GemTrac Rack 1
- Slot Range: 1 to 450 = 450
- Slots/Level: 45
- Customer Filter: US03

Click Save.

Once created zones can be [applied to a repository](#)

Slotting

[Slotting](#) can be done manually or automatically.
