Creating A Zone

Overview

A Zone is a TapeTrack Object which represents a physical storage location. Once created a Zone is then mapped to one of more Repositories to facilitate one or more contiguous physical storage locations for a given virtual location.

This section will explain to you how to create a Zone, and will also explain in detail how to set each of the Zone Properties.

Setting up a zone's parameters allows TapeTrack to give you the specific zone, shelf and slot address to efficiently store and pick volumes.

Creating A Zone

From the menu click Administration→Zone Administration.
