

# Adding and Maintaining a Zone

A **Zone** is a **TapeTrack Object** which represents a physical storage location.

Once created a Zone is then mapped to a **Repository** to track where volumes are allocated to a storage rack and slot number.

## Adding a Zone

From the Main Menu, select Administration→Zone Administration.

From the Zone Tab, click in the Zone List Window, and then Right click to select Add from the Context Menu.

## The Identity Tab

In the Identity tab the Zone properties are:

- **Zone ID** this represents a 1 to 10 character assignable ID for the Zone.
- **Zone description** this represents a long form description of the Zone.
- **Total number of slots** this represents the total number of slots that the Zone contains.
- **Number of slots per row (optional)** this represents the number of slots in each row of the Zone.
- **Customer filter (optional)** this defines which Customers will see the specific Zone when assigning Zones to a Repository.

The screenshot shows a 'New Zone' dialog box with the 'Identity' tab selected. The form contains the following fields and values:

Field	Value
Index	0
Active	<input checked="" type="checkbox"/>
ID	GEMTRAC1
Description	GemTrac Rack 1
Slot Range	1 to 450 = 450
Slots/Level	45
Customer Filter	US03

## The Zone Usage Tab

### Saving the new properties

Click Save.

### Associated Instructions

Once created, Zones can be then be [mapped](#) to one or more [Repositories](#).
