

# Container Assignment Utility

The Container Assignment Utility allows volumes to be assigned to a barcoded container through the use of your preferred [scanning method](#).

To open the Container Assignment Utility select, from the main menu, Tools → Container Assignment Utility.

This will open the Container Assignment Utility window, which by default, will open the scan input window.

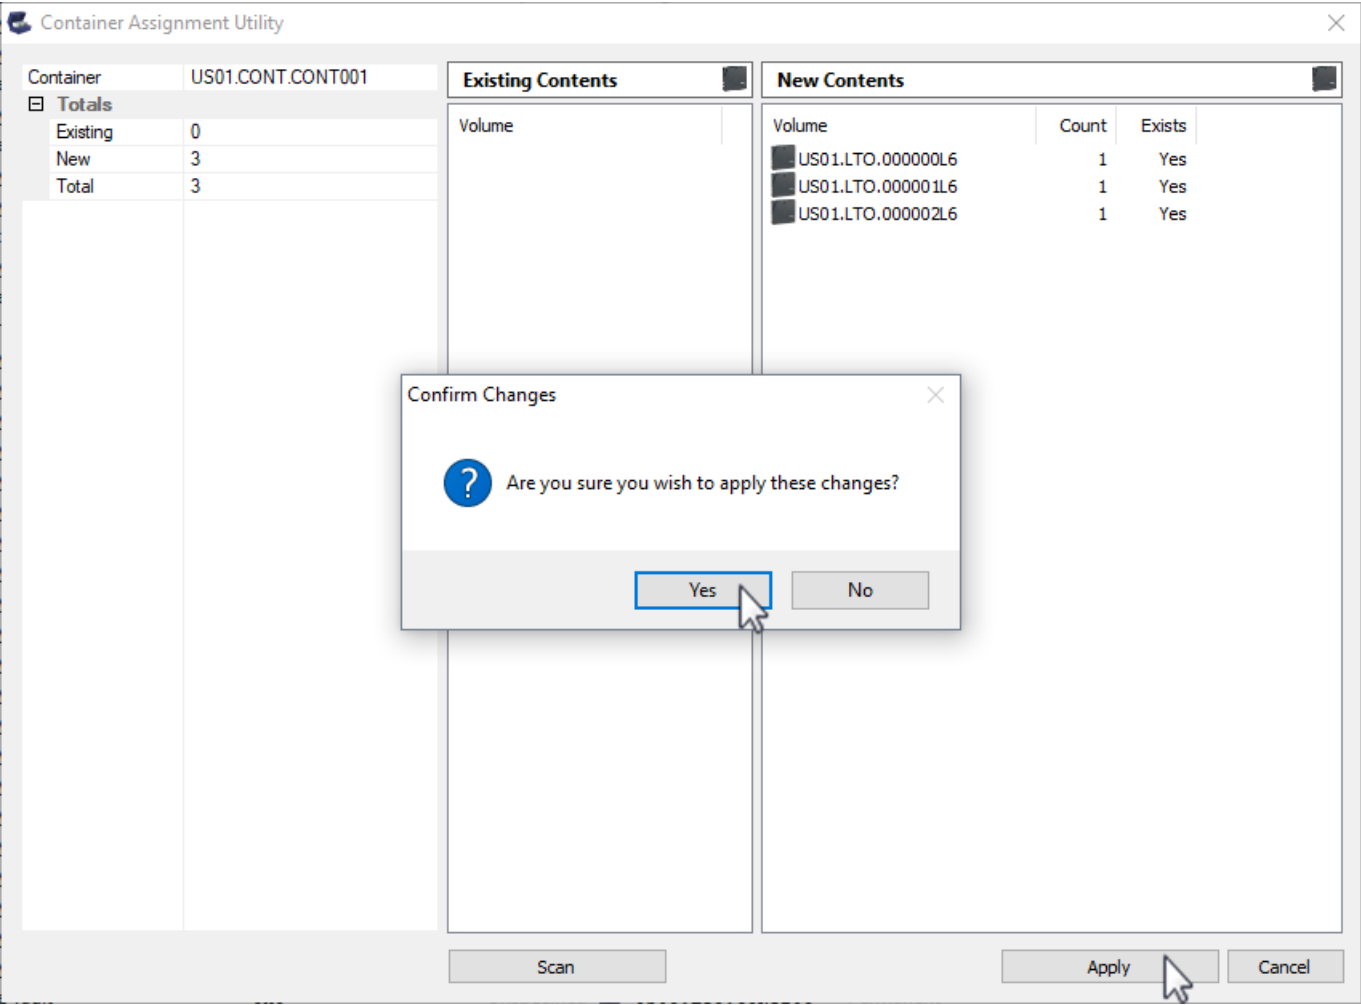

Using your preferred [scanning method](#) scan the container you wish to assign the volumes to and then the volumes. Any volumes scanned before a container are in error of the procedure and will be disregarded.

When you have scanned all volumes assigned to the current container, close the scan in window by clicking the X at the top right.

Click **Apply** to execute container assignment and yes to confirmation.

Alternatively click **Cancel** and yes to confirmation to cancel the volume assignment to that container.

Volumes will then move from the **New Contents** column to the **Existing Contents** column.

Container Assignment Utility

Container

US01.CONT.CONT001
