List contains 37 records      Selected=1      First Selected=5

If you have a large quantity of containers for multiple customers, filtering results on barcode values (e.g. **US01\*** for all US01 containers) can simplify the selection by removing unwanted containers from the display.

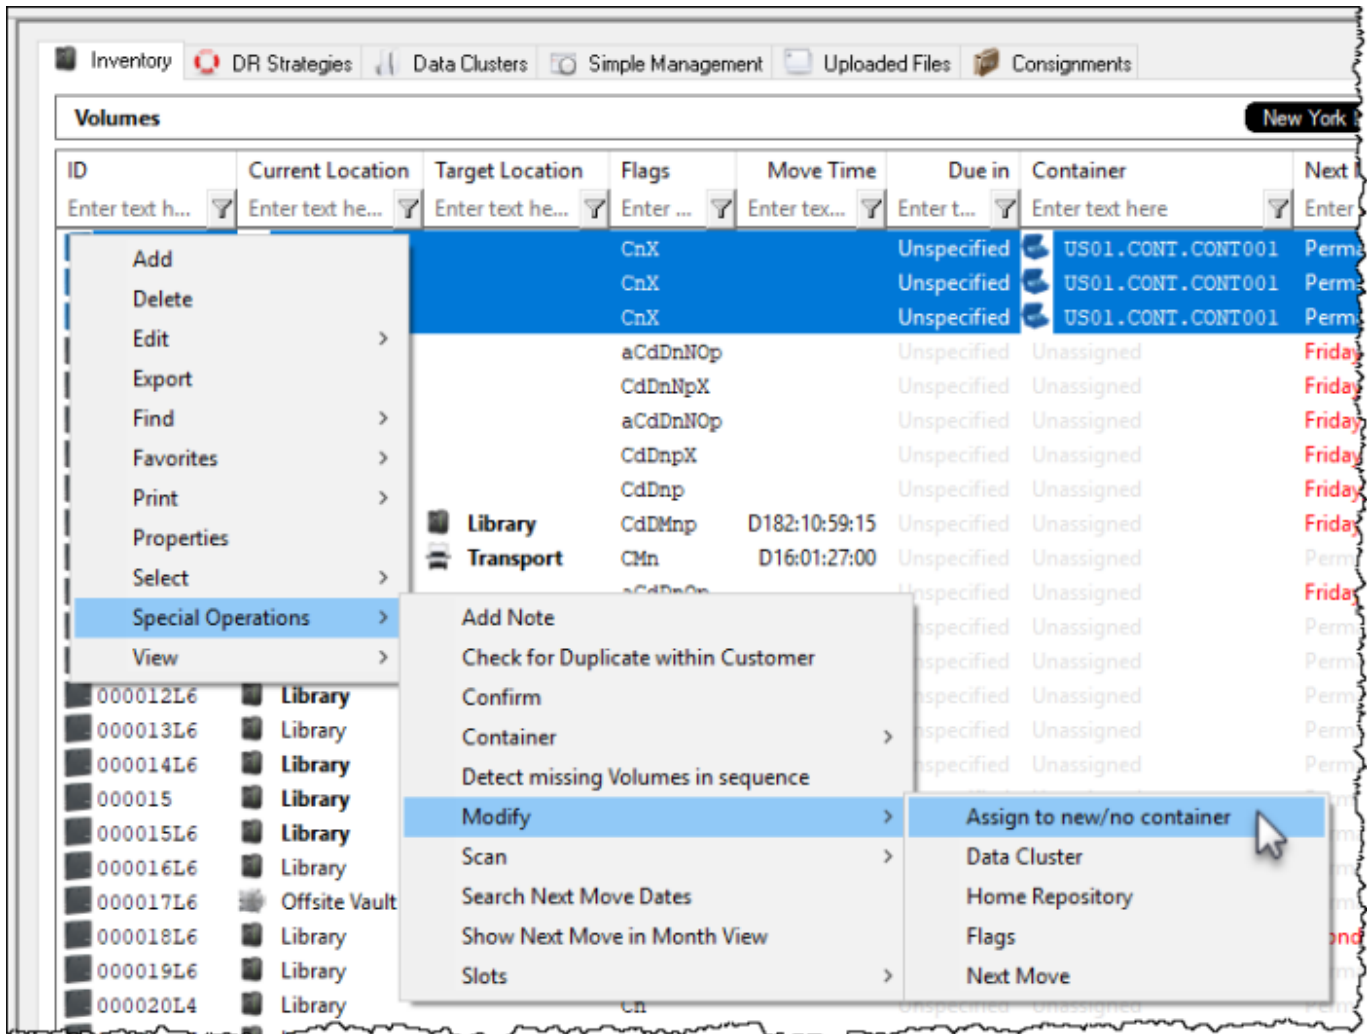

Other filters, container capacity, container content quantity (ie. use 0 for empty containers) or description can also be used to narrow results for container selection.

Click OK to save results and exit back to the inventory window.

## Remove Volumes From Container

Select a volume or range of volumes (shift + click and or control + click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

From the **Container Selection** window check the **Select No Container** checkbox at the top left. This will remove the displayed containers.

Click OK to remove the volumes from the assigned containers and exit back to the inventory window.
