

Overview

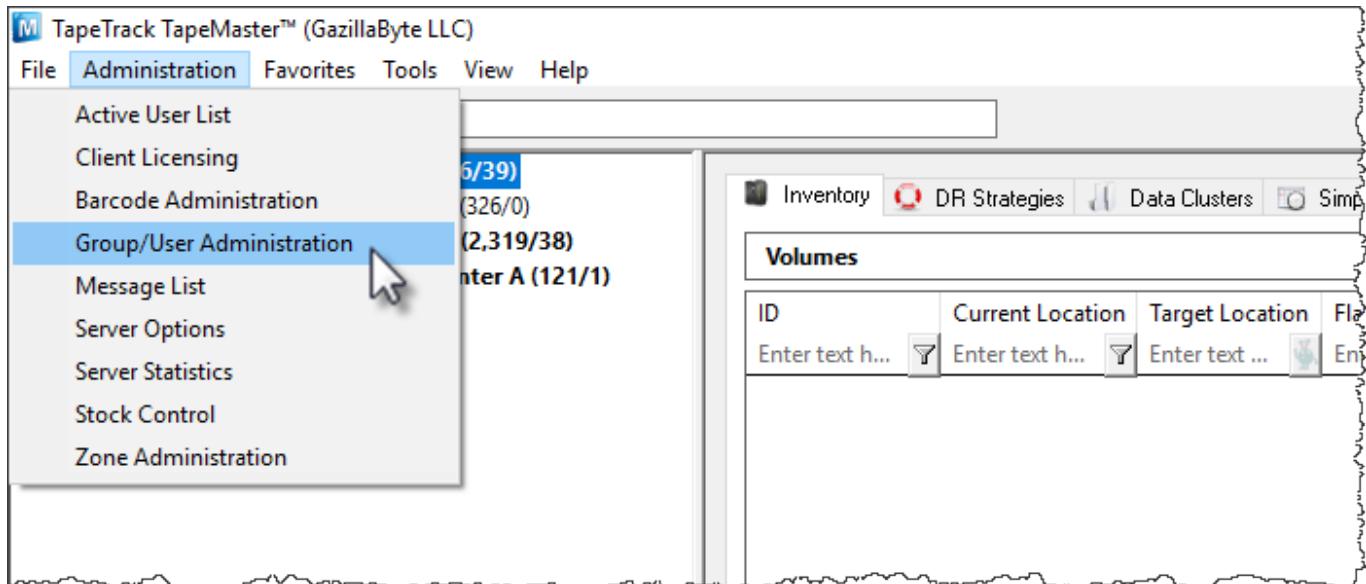

Groups are used to assign access privileges to a collection of users without the need to assign them to each user on an individual basis. This also makes it efficient to manage access changes to the entire group/s without the need to know what users belong to which group.

Creating A Group

if creating a new group from the [Add a New User](#) window skip to [Edit New Group](#)

On the Administration drop down menu in TapeTrack TapeMaster select Group/User Administration.

Select the Groups tab and right click in the main window and select Add Group.

User Administration

Users Groups Active Directory Associations

ID	Description	Users
Enter text here	Enter text here	4
