2025/10/17 19:43 1/3 User Groups

## **Overview**

Groups are used to assign access privileges to a collection of users without the need to assign them to each user on an individual basis. This also makes it efficient to manage access changes to the entire group/s without the need to know what users belong to which group.

# **Creating A Group**

if creating a new group from the Add a New User window skip to Edit New Group

On the Administration drop down menu in TapeTrack TapeMaster select Group/User Administration.

Select the Groups tab and right click in the main window and select Add Group.

### **Edit New Group**

#### Identity

In the Identity tab enter a unique group ID (max 10 alphanumeric characters) and a group description.

#### Roles

Set positions required (optional) for hierarchy of users within the group.

<note tip>Roles do not alter permissions of a User in the TapeMaster product, however, roles can be used in TapeTrack Lite to view Users and modify their information. Users of a lower Role-ID Number (0, 1 or 2) can view and modify Passwords for Users of a higher Role-ID Number using the User Management Task in TapeTrack Lite.<\note>
