

Overview

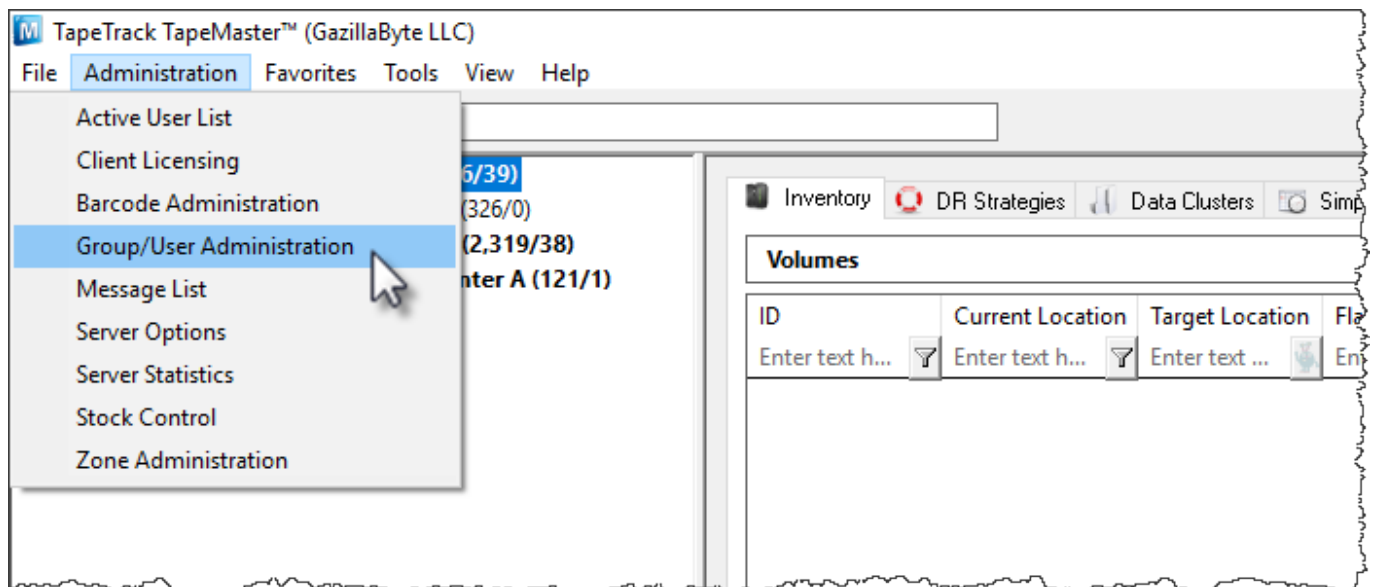

Groups are used to assign access privileges to a collection of users without the need to assign them to each user on an individual basis. This also makes it efficient to manage access changes to the entire group/s without the need to know what users belong to which group.

Creating A Group

if creating a new group from the [Add a New User](#) window skip to [Edit New Group](#)

On the Administration drop down menu in TapeTrack TapeMaster select Group/User Administration.

Select the Groups tab and right click in the main window and select Add Group.

Edit New Group

Identity

In the Identity tab enter a unique group ID (max 10 alphanumeric characters) and a group description.

Roles

Set positions required (optional) for hierarchy of users within the group.

<note tip>Roles do not alter permissions of a User in the TapeMaster product, however, roles can be used in TapeTrack Lite to view Users and modify their information. Users of a lower Role-ID Number (0, 1 or 2) can view and modify Passwords for Users of a higher Role-ID Number using the [User Management](#) Task in [TapeTrack Lite](#).</note>
