

Customer Filter

The Customer Filter allows you to [filter](#) the [Customer Tree](#) to selectively display only [Customer-ID's](#) that match the [filter criteria](#).

Customer Filter String

To filter [Customer Tree](#) insert a [filter string](#) in the [Customer Filter](#) field.

Click on the [Customer Tree](#) and press F5 on your keyboard to update display.

If no [Customers](#) are displayed this means that there are no [Customer-ID's](#) that match the [filter string](#).

The screenshot shows the TapeTrack TapeMaster application window. The menu bar includes File, Administration, Favorites, Tools, View, Help, Customer Filter, and UK02. The main pane displays a tree structure under 'GazillaByte LLC - Production (0/0)', with 'Customer Filter' set to 'UK02'. The right pane shows an 'Inventory' table with columns for 'ID' and 'Current Location'. The 'ID' column contains entries: 130001L6, 130002L6, and 130003L6. The 'Current Location' column shows 'Library' for the first two and 'Offsite Vault' for the third. Filter input fields for 'ID' and 'Current Location' are present.

To return to a full [Customer Tree](#) display, delete the filter string in the Customer Filter field, click on the [Customer Tree](#) and press F5 on your keyboard.

The screenshot shows the TapeTrack TapeMaster application window. The menu bar includes File, Administration, Favorites, Tools, View, Help, Customer Filter, and UK02. The main pane displays a tree structure under 'GazillaByte LLC - Production (352/58)', with 'Customer Filter' removed. A large 'F5' key with a hand cursor is overlaid on the tree view. The right pane shows an 'Inventory' table with columns for 'ID' and 'Current Location'. The 'ID' column contains entries: 130001L6, 130002L6, and 130003L6. The 'Current Location' column shows 'Library' for the first two and 'Offsite Vault' for the third. Filter input fields for 'ID' and 'Current Location' are present.

Customers can also be searched by Customer Description rather than [Customer-ID](#) by using the [Find Customer](#) function.
