Adding and Maintaining DR Strategies

A Disaster Recovery Strategy, referred to in TapeTrack as a "DR Strategy", is a list of Volumes necessary to restore a system back to a given time in the event of catastrophic system failure. Typically, these DR Strategies are automated through TapeTrack Sync's integration with your back-up software; however, they can be manually created as well.

Creating a DR Strategy

DR Strategies can be manually created in the DR Strategies Administration Tab by: Right-clicking and selecting Add or by pressing the **Insert** key on the keyboard. This will launch the DR Strategy Creation window.

Identity

The DR Strategy Creation window will prompt for a description and provide tabs that offer the ability to take notes regarding a DR Strategy and also some various options. A full summary of these options can be found under the Edit DR Strategy page.

To create a DR Strategy, enter a description and click "Save". The new DR Strategy will appear in the DR Strategies Administration Tab.

Edit DR Strategy		×

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~		~~~~~

Return to Inventory Administration Tab Volume List and select the volumes that should be included in the new DR Strategy. Right-click the highlighted items and select Edit  $\rightarrow$  Copy  $\rightarrow$  Volumes.

Volumes					Los A	ngeles Data Ce	nter LTO Cart	idge
ID	Current Location	Target	Location	Flags	Move Time	Due in	Container	Next Move
Enter text h	🍸 Enter text h 🍸	Enter t	ext 🍸	Enter	🝸 Enter t 🍸	Enter t 🍸	Enter t 🍸	Enter text her
0000 <mark>001 6</mark>	M Libran/			Cn		Unspecified	Unassigned	Permanent
0000	Add	[		CEnNX		Unspecified	Unassigned	Permanent
0000	Delete			aCEnQS		Unspecified	Unassigned	Permanent
0000	Edit	>	Сору	>	Attributes			
0000	Export		Paste	>	Containers			
0000	Find	> [		UIIA	Unqualified	Volumes		
0000	Favorites	,		Cn		l Volumes (wit	hout suffix)	
0000	Print			Cn	Volumes		,	Ctrl+C
0000		í		Cn	volumes	-	11 1 1	
0000	Properties			CnX		Uksecified		
0000	Select			Cn				
0000	Special Operations	>		CnX				
0000	View	>		Cn				

Return to the DR Strategies Administration Tab and double-click or right-click the newly created DR Strategy and select "Properties" to launch the Edit DR Strategy window.

#### **Item List**

A new tab will appear that was not in the DR Strategy Creation window called "Item List". Select this tab. Right-click and select Edit  $\rightarrow$  Paste. The Volumes that were selected in the Volume List will appear in Item List. If these Volumes are not in a Repository that is set as offsite, their status will appear as "Volume is NOT offsite".

Media-ID	Volume-ID	Repository	Location	Status	
Ent 🍸	Enter te		Enter text h 7	Enter text here	5
LTO	000002L6	Library	No-Alloc [0]	Volume is NOT off-site	
LTO	000003L6	Library	No-Alloc [0]	Volume is NOT off-site	
LTO	000005L6	Library	No-Alloc [0]	Volume is NOT off-site	
LTO	000000L6	Library	No-Alloc [0]	Volume is NOT off-site	
De	elete	1			
Ed	lit →	Сору			
De	int >	Paste 🕟			

Once the volumes are moved to an offsite Repository, the DR Strategy will gain a status of "OK".

Media-ID	Volume-ID	Repository	Location	Status	
Ent 🍸	Enter te 🝸	Enter text 🝸	Enter text h 🍸	Enter text here	5
LTO	000002L6	Offsite Vault	No-Alloc [0]	OK	
LTO	000003L6	Offsite Vault	No-Alloc [0]	ОК	
LTO	000005L6	Offsite Vault	No-Alloc [0]	ОК	
LTO	00000L6	Offsite Vault	No-Alloc [0]	ОК	

#### Notes

The Notes Tab provides an area to write notes about a DR Strategy. This can include emergency contacts, plans, instructions, etc.

#### Options

The Options Tab provides four different options that govern how the DR Strategy behaves.

- **Depreciated**: When a DR Strategy is depreciated, it is considered no longer active. This means it no longer affects the Library Health score but has not yet been deleted.
- **Expiry**: The Expiry date sets the date for when the DR Strategy is considered no longer relevant or useful.
- Target Repository: The Target Repository is the Repository that Volumes in the Item List are

sent to when the DR Strategy is executed.

• Latency: Latency sets a certain number of minutes before the DR Strategy is included in the Library Health Score. Since a DR Strategy is considered to have errors whenever a Volume in the Item List is not in a Repository set as offsite, the latency allows time for Volumes to arrive at the offsite Repository before affecting Library Health.
