

# Generation Dispersement Table

The Generation Dispersement function displays a table of selected volumes based on their generation (ie. LTO 1, LTO 2) and current scratch (Z flag) status.

## View Generation Dispersement Table

Select volumes to be included in table by either right click in the volume window and Select → All or Ctrl + A to select all, or range select by shift + click and/or Ctrl + click.

Select from the popup whether you want the results to merge repositories and/or attributes as well as whether or not to ignore or include case sensitivity.
