

Library Health

The Library Health field in the [Volume List Properties Window](#) displays a score out of 100, measuring the health of the selected [Customer's Media Type](#).

Problems

The following list of items will deduct from a perfect Library Health Score:

- One or more [Volumes](#) have received an overdue [Flag](#) for being overdue at their Current [Repository](#).
- There are no [Volumes](#) in a [Repository](#) that is set to offsite in the [Options Tab](#) of the [Repository](#)

[Properties Window](#) or it has been a number of days since [Volumes](#) have been sent to an offsite [Repository](#).

- [Disaster Recovery Strategies](#) are either non-existent or have not been created recently.
- [Disaster Recovery Strategies](#) have errors, meaning that [Volumes](#) necessary for a restore are not in a [Repository](#) that is set to offsite in the [Options Tab](#) of the [Repository Properties](#) Window.
- [Volumes](#) have received an [audit Flag](#) due to a failed physical audit.
- A sync with a Backup System has never been initiated through [TapeTrack Sync](#) or has not been initiated in several days.

Library Statistics

The Library Statistics display, on a per [repository](#) basis, the total [volumes](#), number of volumes moving in and out, minimum of scratch volumes required and the number of scratch volumes present.

Excluding Media

Media types can be excluded from health check statistics through [Media properties option tab](#)
