

Remove Volumes From Container

Remove Volumes Via The Volume Media Inventory Window

[master_volume_from_container.mp4](#)

Select a volume or range of volumes (Shift+Click and or Ctrl+Click) from the inventory window to remove from container/s. Volumes assigned to different containers can be selected and removed at the same time, there is no need to select one container at a time.

The screenshot shows the TapeTrack TapeMaster™ (GazillaByte) interface. The main window is titled 'Volumes' and is filtered by 'Los Angeles Data Center' and 'LTO Cartridge'. The table below represents the data shown in the interface:

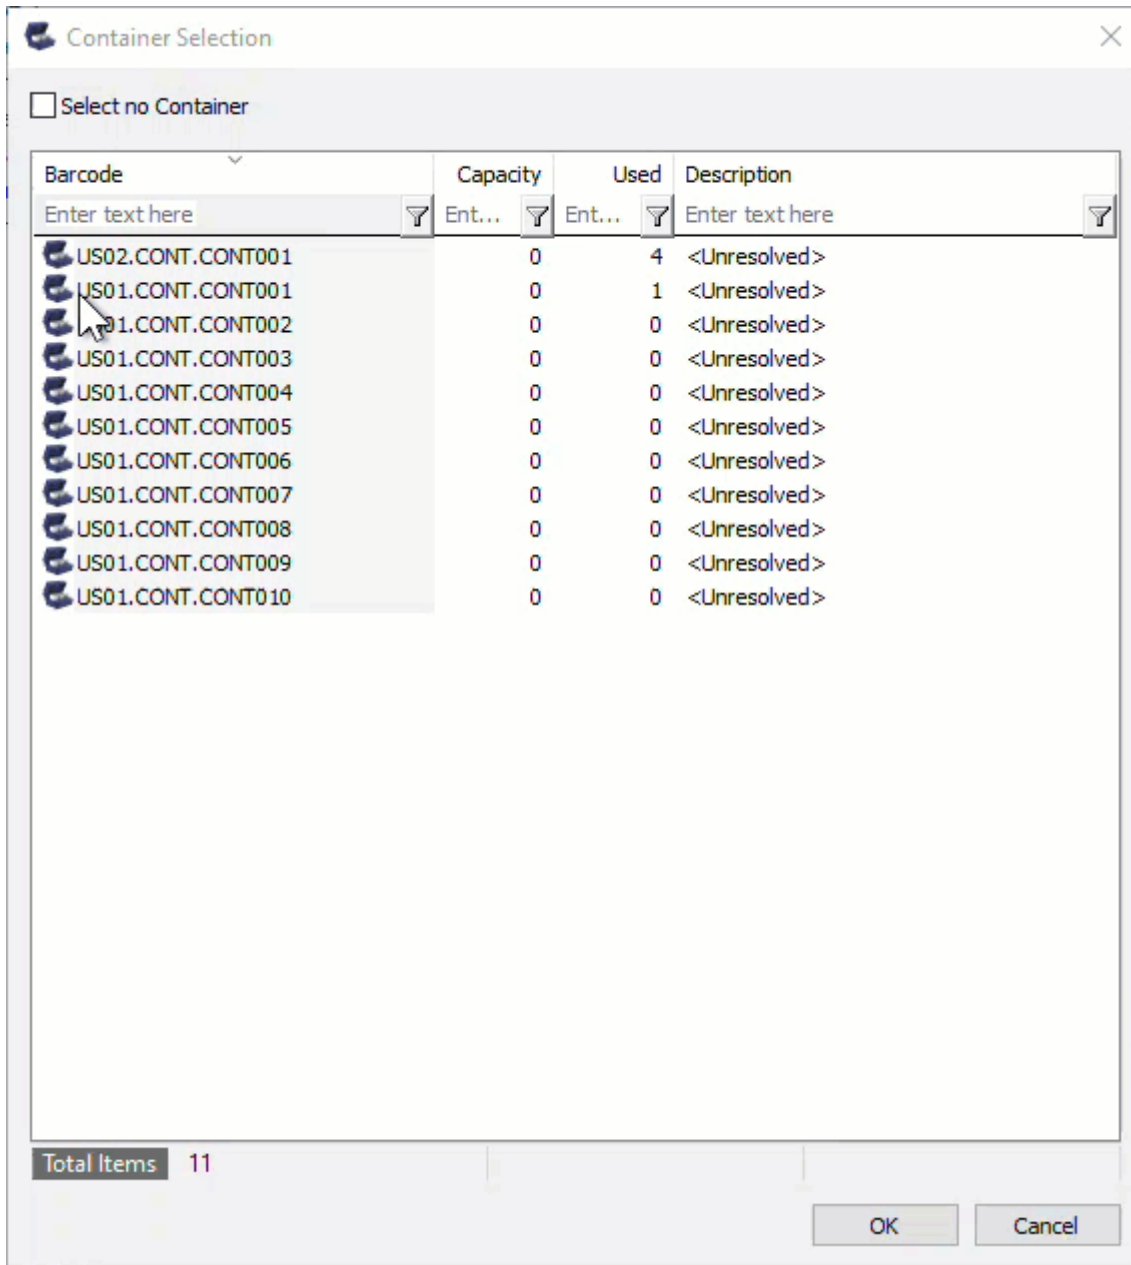

ID	Current Location	Target Location	Flags	Container	Description

The interface also shows a 'Repositories' section with icons for GemTrac, Library, and Offsite Vault. The status bar at the bottom indicates 'Connection 127.0.0.1 uses AES 256 bit encryption' and 'Tape'.

Right click on the highlighted Volumes and select Special Operations > Modify > Assign to new/no container

From the **Container Selection** window check the **Select No Container** checkbox at the top left. This will remove the displayed containers.

Click OK to remove the Volumes from the assigned containers and exit back to the inventory window.

TapeMaster will now display the Volumes with no assigned containers.
