

# Adding and Maintaining Repositories

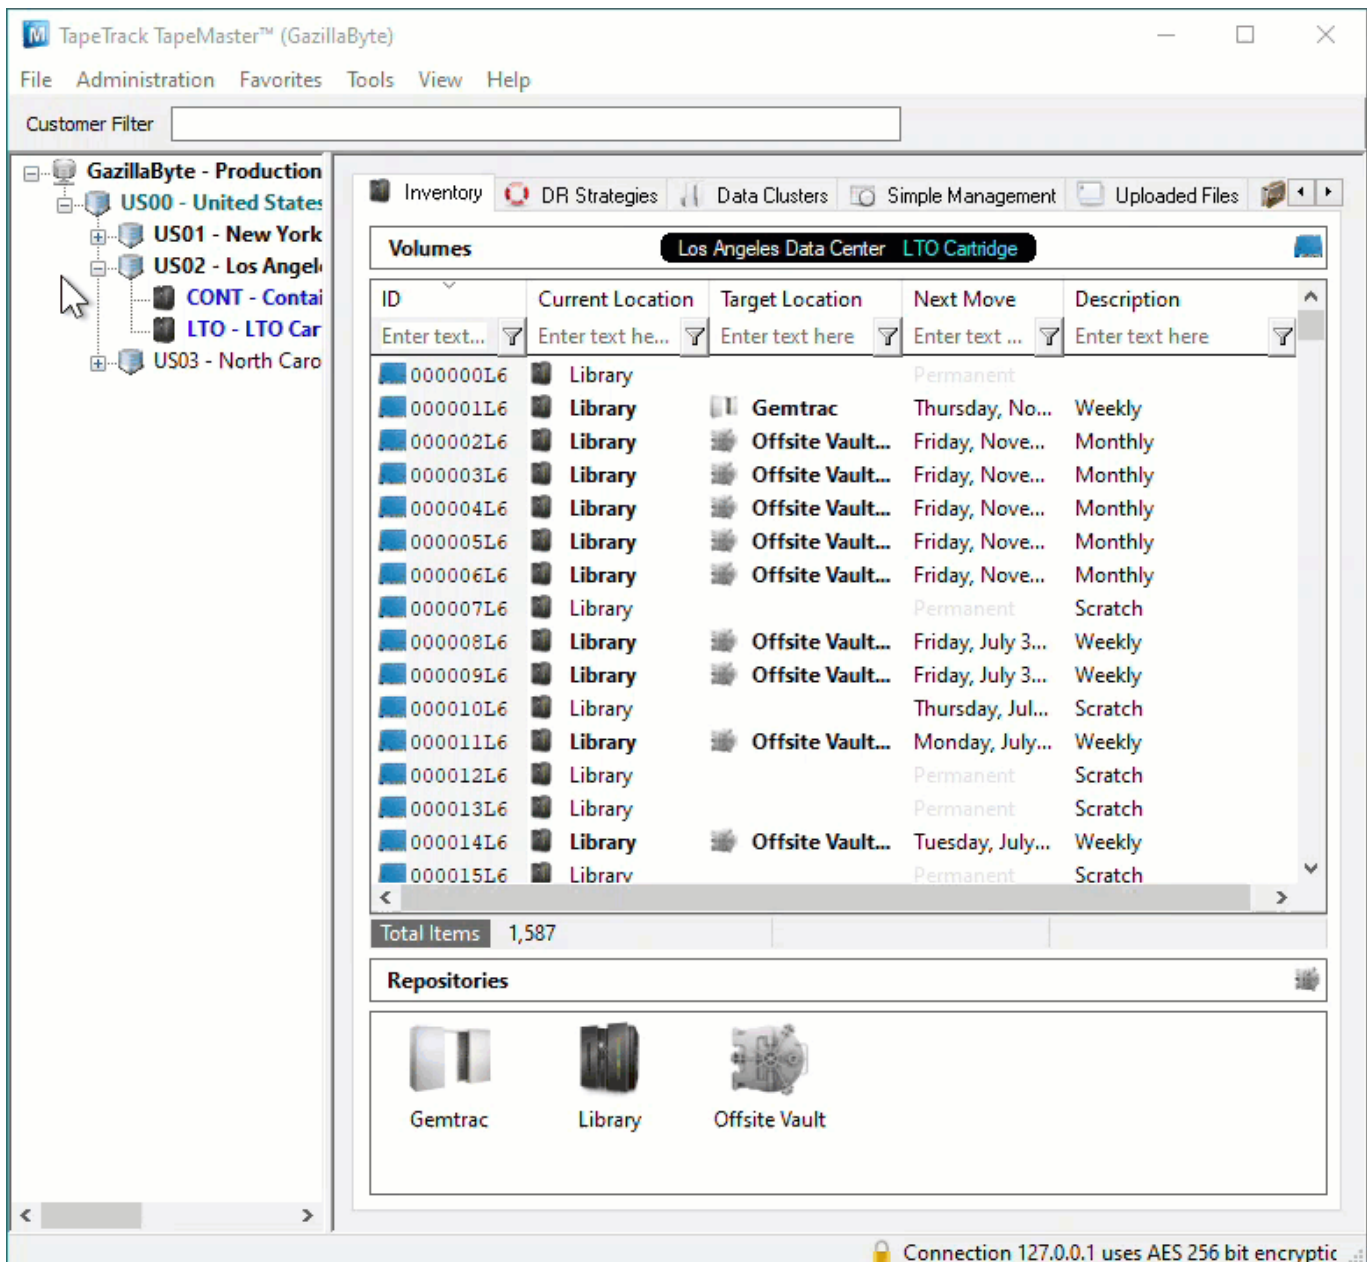

[Repositories](#) are locations where [Volumes](#) can be located. This page contains information about Adding and Deleting [Repositories](#).

## Adding Repositories

To add a [Repository](#), right-click on the [Media Type](#) that the [Repository](#) will be listed under and select Add Repository.

Or, alternatively, right-click in the Repository window and select Add.

This will launch Edit New Repository window.

## Basic Repository Options

### Identity

Insert the [Repository-ID](#) (up to 4 permanent alphanumeric characters) and [Repository Description](#) (up to 20 alphanumeric characters).

The Repository-ID is a permanent value and cannot be edited at a later point. The Repository Description can be altered at any time.

Attributes

Customer-ID	US02	Los Angeles Data Center
Media-ID	LTO	LTO Cartridge
Repository-ID		
Description		

Save Cancel Help

## Options

Select type of [Repository](#) to change display icon to match repository function. The options are:

- Destruction
- Disaster Recovery
- Legal Hold
- Library
- Ordered
- Rack
- Scratch
- Transport
- Vault

Select the [Repository](#) the [Volume](#) will move to next (required for all automated tape movement) after this [Repository](#).

The screenshot shows a window titled "Edit New Repository" with a close button in the top right corner. Below the title bar is a navigation bar with tabs: Identity (selected), Zones, Slot Usage, Options, Usage History, Movement History, and Certification. The main area is labeled "Attributes" and contains four rows of input fields:

Customer-ID	US02	Los Angeles Data Center
Media-ID	LTO	LTO Cartridge
Repository-ID	TRAN	
Description	Transport	

At the bottom of the window are three buttons: Save, Cancel, and Help.

Click Save to create [Repository](#).

### Advanced Repository Options

- [Zones](#)
- [Slot Usage](#)
- [Options](#)
- [Usage History](#)
- [Movement History](#)
- [Certification](#)

# Deleting a Repository

Before you can delete the Repository, move all **Volumes** from the Repository and Confirm into another location. Any **Volumes** in a move to the **Repository** will be placed in a move to the Initial **Repository**.

To delete a **Repository**, right-click on the **Repository** that needs to be deleted and select Delete.

If the Repository you are attempting to delete is the current Default Repository, you will receive a popup confirming you want to reset the Default value, click Yes to continue.

Click Yes to the Confirm Delete popup.

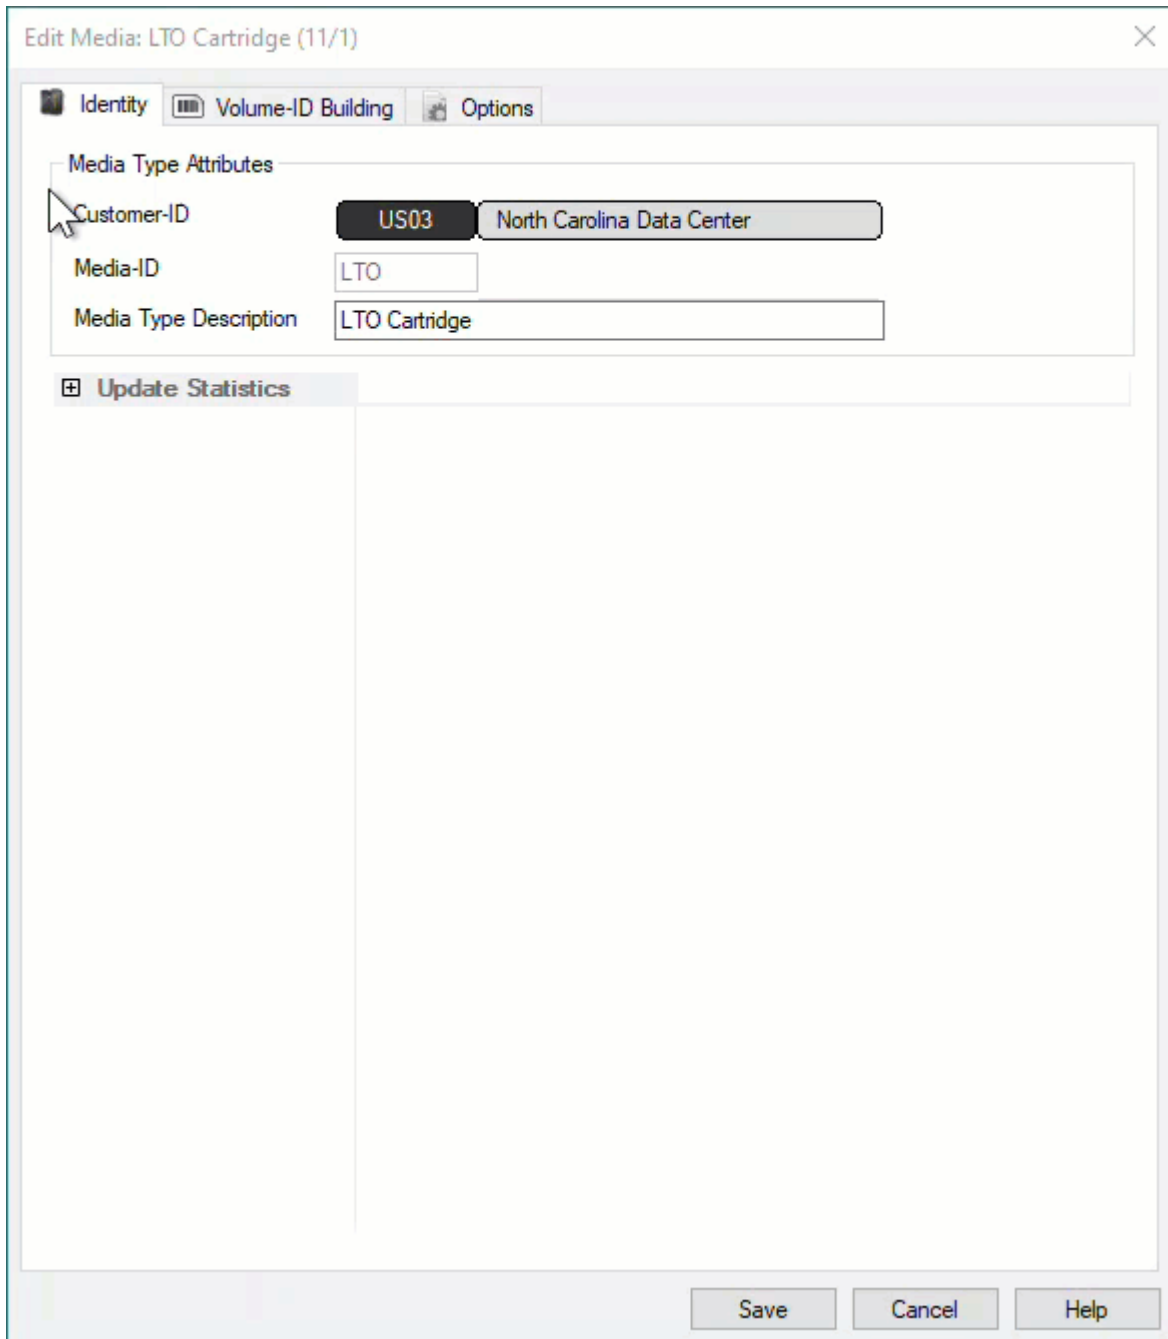

In older releases, any **Repository** set as the default (where **Volumes** are added to when a Target **Repository** is not specified) cannot be deleted until the dependency is removed.

To remove the default setting, right-click the **Media Type** in the **Customer Tree** and select Properties.

On the Options tab, change the setting **Default Repository** to <No Selection>, or another Repository, and click Save.

The [Repository](#) may now be deleted by right-clicking and selecting Delete and OK to warning dialog.
