

# Creating and Editing a Repository.

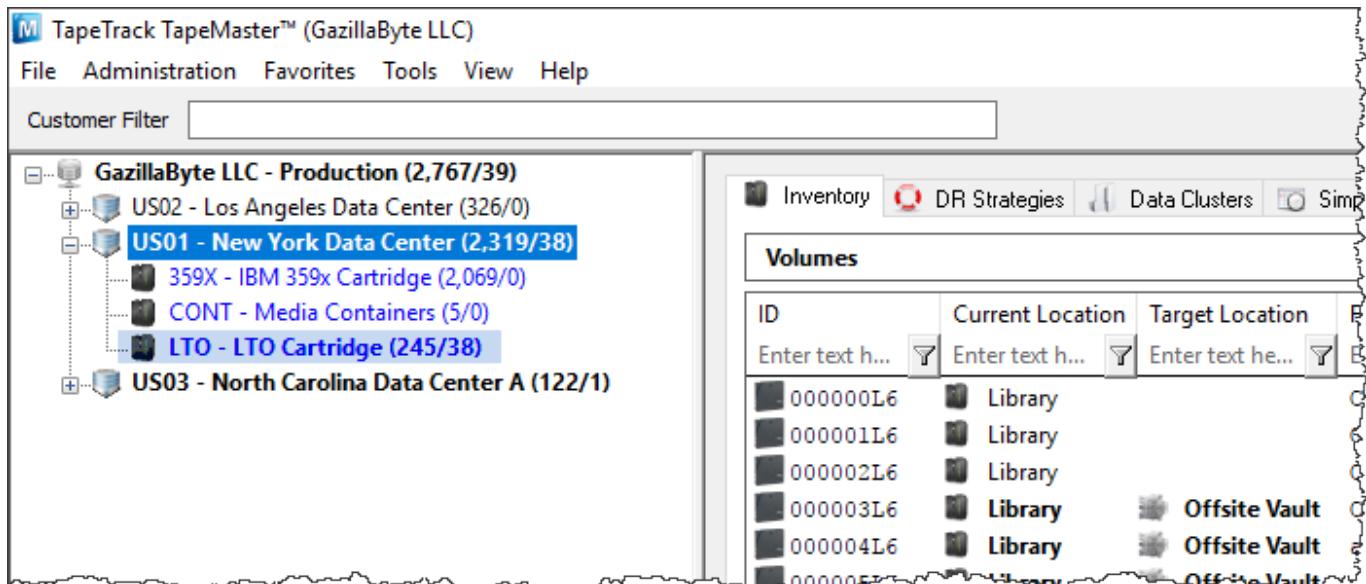

## Overview

A Zone is a specific location where Volumes can be Slotted. Most commonly, Zones are shelving units, cabinets, or high-density storage drawers. You must [create a zone](#) before it can be applied to a repository.

## Associating a Zone with a Repository

Once Zones are set in [Zone Administration](#), they must be added to the appropriate [Repository](#). In the options tab for that repository change Enable Slotting from False to True

Select the [Customer](#) and [Media type](#) that the zone/s will be applied to.

The screenshot shows the TapeTrack TapeMaster interface. On the left, a tree view displays data centers and their components. The 'US01 - New York Data Center' is selected. On the right, a 'Volumes' table lists several volumes with their current and target locations. The 'Target Location' column shows 'Library' for most volumes and 'Offsite Vault' for the last two.

ID	Current Location	Target Location
00000016	Library	
00000116	Library	
00000216	Library	
00000316	Library	Offsite Vault
00000416	Library	Offsite Vault
00000516	Library	Offsite Vault

Right-click the required repository and select [Properties](#), or double-click the [repository](#).

Edit Repository: Offsite Vault

Identity Zones Slot Usage Options Usage History Movement History Certification

Ranges

Maximum Slots: 0

Utilization: No Slots Allocated

Index	Zone	Start	End	Total	Range	Used
@ 001						
@ 002						
@ 003						
@ 004						
@ 005						
@ 006						
@ 007						

From the drop down list Zone ID select the zone required.

Adjust the slider Slot Ranges to only include the slot allocation required from the zone. Selected slots can be all or adjusted in from either the start or end but must be sequential.

Edit Range Information

Zone Selection

Zone-ID: 0001 GemTrac 1

Slot Start: 1 Level 01, Slot S01

Slot End: 450 Level 10, Slot S45

Slot Total: 450

Slots/Level: 45

Slot Ranges

Start Slot: 1 Level/Slot: 1 1

End Slot: 350 Level/Slot: 8 35

Total Slots: 350

C-ID	M-ID	R-ID	Start	Slot	End	Slot Total
US01	LTO	OFFS	Level 01, Slot S01	1	Level 10, Slot S45	450

OK Cancel

Click OK to save zone allocation.

Multiple zones can be added to a repository, to increase slot capacity, by repeating the process as required.
