## **Scan To Assign Slots**

## **Overview**

2025/04/18 13:24

The Scan to assign slot function allows you to select a zone and slot/s to allocate a group of volumes too using a barcode scanner.

1/3

## Scan To Assign Slots

To use this functions you must have zone/s assigned to the select repository with sufficient vacant slots.

With the required customer and media type open, right click the repository to assign the slots for and click View Repository Map

## Last update: 2025/01/21 22:07 master:repository\_zone\_scantoassign https://rtfm.tapetrack.com/master/repository\_zone\_scantoassign?rev=1501172165

Scan the volumes in using a barcode scanner in the order you want them slotted.

Im Scan to Assign						×
		Image: Constraint of the second se		US03 LTO True False		
Barcode Customer 000003L5 North Carolina Data Center 000001L5 North Carolina Data Center 000000L5 North Carolina Data Center	Media Type Volume-ID LTO Cartridge 000001 LTO Cartridge 000001 LTO Cartridge 000000	Message LS Request OK LS Request OK LS Request OK			Multiline Records	False

Once the volumes have been scanned, close the scan window. Allocated volumes will be displayed with a slot status of **paste update pending**. Right click the highlighted volumes and select Apply Update to save the changes to the database.

Once the update has been performed the slot status will now display as reserved and the volumes will now be in a **move status** in TapeMaster. If the volumes are not yet physically slotted, close the Slot allocation window and press F5 in the inventory window in TapeMaster to refresh display information. If the volumes are physically in their allocated slots you can confirm them by right clicking the highlighted volumes and selecting Confirm before closing the window.
