

Ping Server

Ping Server allows you to ping the TapeTrack Framework Server, using TMSS10Ping, from within TapeMaster, negating the need to open a command prompt and run the program from there.

Run Ping Server

From the main menu in TapeMaster, select Tools > Run Command > Ping Server

The screenshot shows a 'Run Command' window with a table containing one row of data. A context menu is open over the first row, showing 'Run' and 'Select' options. The table has the following data:

Seq.	Binary	Arguments	Environment	RC	Seconds
1	C:\Program Files\TapeTra	testbed.tapetrack.com		2	S1

At the bottom of the window, there are three tabs: 'Commands', 'Program Output (stdout)', and 'Program Messages (stderr)'. The 'Program Output (stdout)' tab is currently selected.

The image shows a 'Run Command' window with a table of output. The table has three columns: 'Output', 'Cmd.', and 'Rec.'. The output text is as follows:

```
C:\Program Files\TapeTrack\TapeTrack TapeMaster\TMSS10Ping testbed.tapetrack.com
