

Ping Server

Ping Server allows you to ping the TapeTrack Framework Server, using TMSS10Ping, from within TapeMaster, negating the need to open a command prompt and run the program from there.

Execute Ping Server

From the main menu in TapeMaster, select Tools > Run Command > Ping Server

The screenshot shows a window titled "Run Command" with a table of command execution results. The table has the following columns: Seq., Binary, Arguments, Environment, RC, and Seconds. The first row is highlighted in blue and has a context menu open over it. The context menu contains two options: "Run" and "Select".

Seq.	Binary	Arguments	Environment	RC	Seconds
1	C:\Program Files\TapeTra	testbed.tapetrack.com		2	S1

At the bottom of the window, there are three tabs: "Commands", "Program Output (stdout)", and "Program Messages (stderr)".

The image shows a 'Run Command' window with a table of output. The table has three columns: 'Output', 'Cmd.', and 'Rec.'. The output text is as follows:

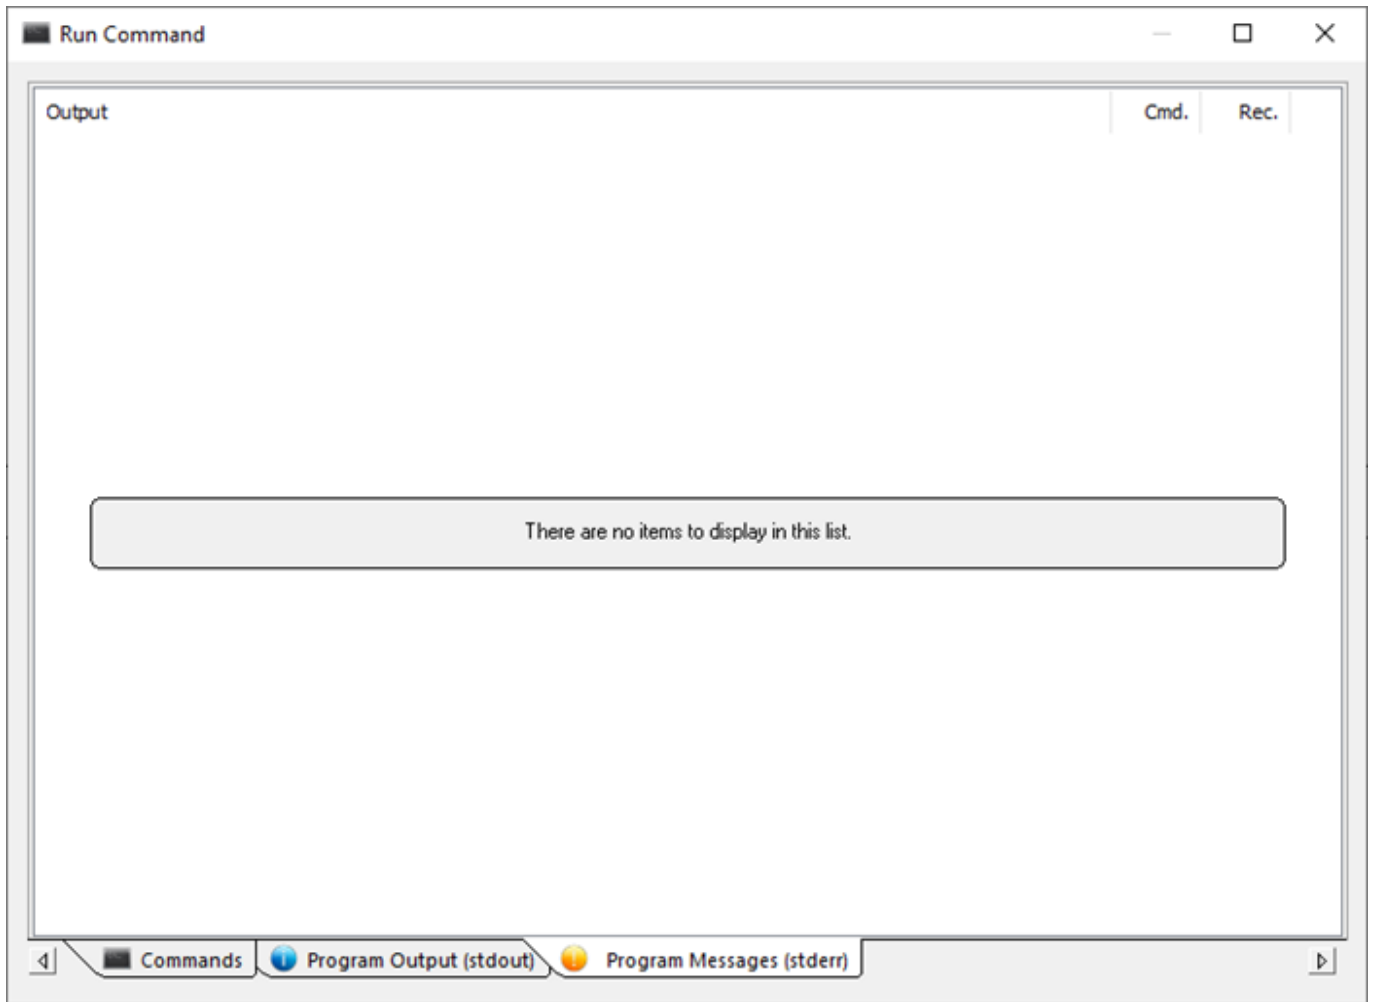

```
C:\Program Files\TapeTrack\TapeTrack TapeMaster\TMSS10Ping testbed.tapetrack.com
44 bytes from 192.241.211.124: seq=1 time=188.00 ms
44 bytes from 192.241.211.124: seq=2 time=181.00 ms
44 bytes from 192.241.211.124: seq=3 time=183.00 ms
44 bytes from 192.241.211.124: seq=4 time=177.00 ms

--- testbed.tapetrack.com TMSS10Ping statistics ---
4 packets transmitted
round-trip min/avg/max = 0.00/182.25/188.00 ms
```

The table below represents the data shown in the 'Run Command' window:

Output	Cmd.	Rec.
C:\Program Files\TapeTrack\TapeTrack TapeMaster\TMSS10Ping testbed.tapetrack.com		1
44 bytes from 192.241.211.124: seq=1 time=188.00 ms		1
44 bytes from 192.241.211.124: seq=2 time=181.00 ms		2
44 bytes from 192.241.211.124: seq=3 time=183.00 ms		3
44 bytes from 192.241.211.124: seq=4 time=177.00 ms		4
---		5
testbed.tapetrack.com TMSS10Ping statistics ---		6
4 packets transmitted		7
round-trip min/avg/max = 0.00/182.25/188.00 ms		8

At the bottom of the window, there are three tabs: 'Commands', 'Program Output (stdout)', and 'Program Messages (stderr)'. The 'Program Output (stdout)' tab is currently selected.
