

Scan to Select Volumes

Right-hand click in the Volume Window of TapeMaster.

Select Special Operations → Scan → Scan to Select.

Scan the volumes, using your preferred [scanning method](#), you wish to select.

The screenshot shows the 'Scan to select Volumes' window. On the left, a QR code scanner is visible. The main area displays a table titled 'Messages (6)' with columns: Barcode, Customer, Media Type, Volume-ID, Message, and Count. The data is as follows:

Barcode	Customer	Media Type	Volume-ID	Message	Count
123456L6	North Carolina Data Center	LTO Cartridge	123456L6	Unknown Volume-ID	1
000009L5	North Carolina Data Center	LTO Cartridge	000009L5	Request OK	1
000008L5	North Carolina Data Center	LTO Cartridge	000008L5	Request OK	1
000005L5	North Carolina Data Center	LTO Cartridge	000005L5	Request OK	1
000003L5	North Carolina Data Center	LTO Cartridge	000003L5	Request OK	1
000001L5	North Carolina Data Center	LTO Cartridge	000001L5	Request OK	1

On the right, the 'Advanced Capture' panel is open, showing settings for 'Defaults' (Customer-ID: US03, Media-ID: LTO), 'Options' (Save Defaults: True, Enable Sounds: True, Multiline Records: False, Auto Hash 20+: True), and 'RFID Options' (SSP RFID Port: 1, SSP Barcode Port: 0).

All volumes present in the inventory will display **Request OK** in the scan window, any volumes not present in the inventory will display **Unknown Volume-ID**.

Exit from the Scan Window by clicking the X at the top right.

If you have any scan errors, the **Failed Operations** window will display the unknown volumes, as well as all successful scans if the **Display Results That Were OK** checkbox is checked. From this window you can:

- Copy volume ID's to clipboard.
- Export volume ID's to file.

Exit Failed Operations by closing window by clicking OK or X at the top right.

! Failed Operations
