

Setting A Password

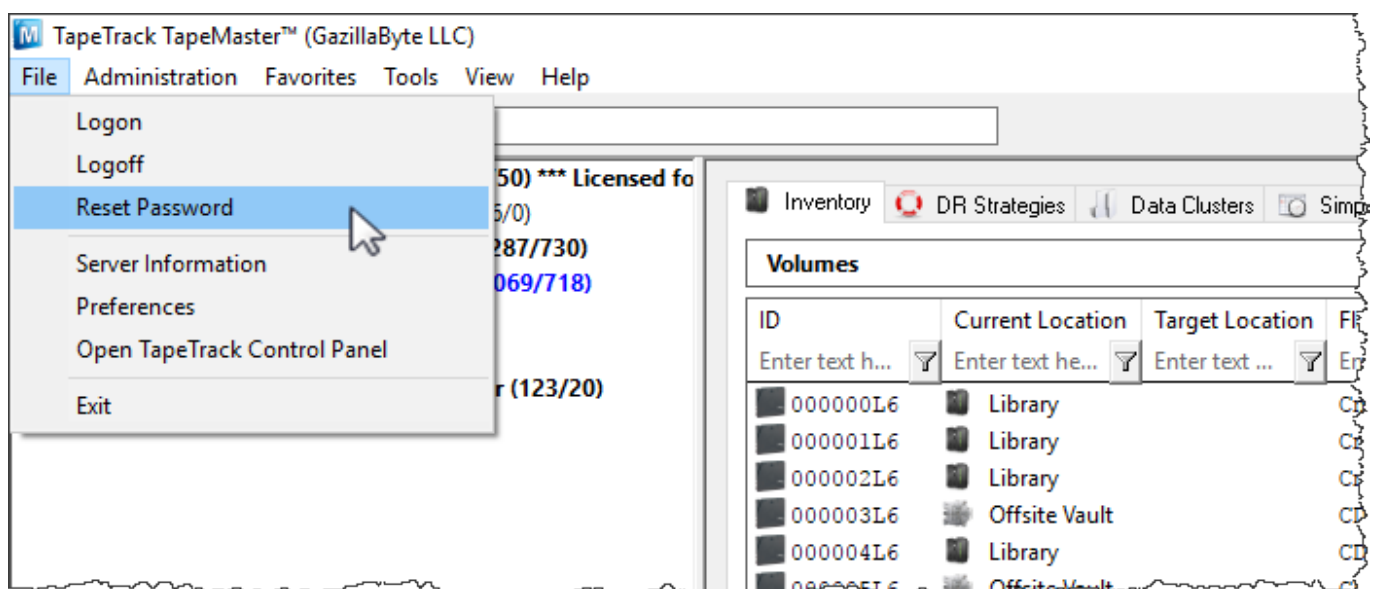

There are several reasons to set or change passwords in TapeTrack such as restricting unauthorized access, good security practices or re-instating disabled user.

As a password is a secure login credential to access TapeTrack, best password practices should be employed when setting or changing user passwords.

If using Active Directory authentication, local TapeTrack passwords will not be referenced when a user logs in (with No MD5 box checked on login screen) but can be used to reset access when a user account has been disabled or revoked.

Changing A Password For Current User

Open the password utility by selecting File → Reset Password from the main menu.

Setting Your Own Password

In the **Password change** window, enter:

- your current password
- new password
- verify new password

A dialog box titled "Password Change" with a yellow padlock icon. It contains four input fields: "User" (with "Current User" selected), "Current Password", "New Password", and another "New Password" field. A "Random" button is located below the second "New Password" field. At the bottom are "OK" and "Cancel" buttons.

Password Change

User: Current User

Current Password: [masked]

New Password: [masked]

New Password: [masked]

Random

OK Cancel

Click OK to update your password and return you to the TapeTrack Lite start screen.

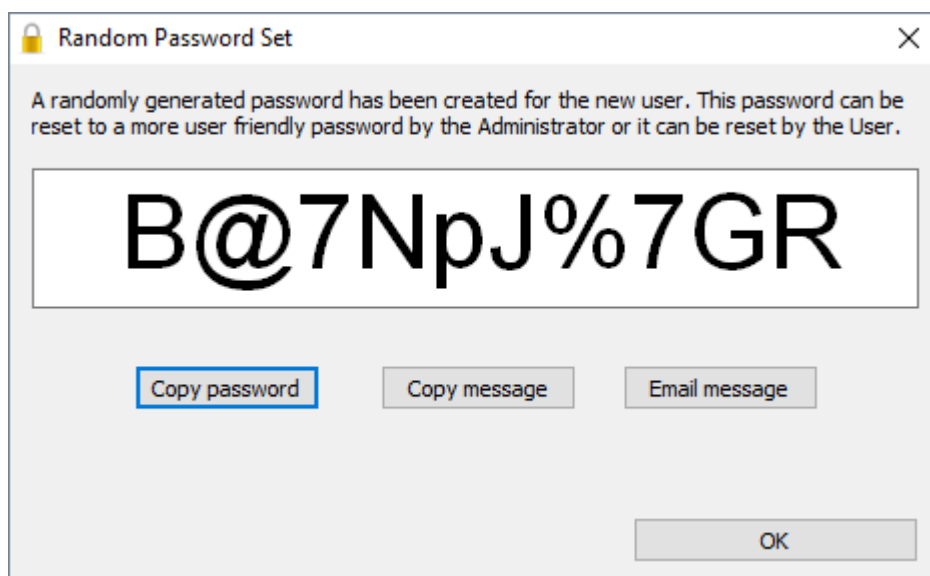

Randomly Generate Password

Click the Random button if you prefer a randomly generated password to be entered into the password fields.

Click the Copy password button to copy generated password to your clipboard.

Clicking the Copy message button will give you the text " A new TapeTrack User-ID has been created for you to use. You can access this account using the User-ID (Current User) and the password(B@7NpJ%7GR)" copied to your clipboard for convenience when sending a message to the user with login details.

Clicking the Email message button will open up your default email client with the same text as Copy message.

A dialog box titled "Random Password Set" with a yellow padlock icon. It contains a text area with the message: "A randomly generated password has been created for the new user. This password can be reset to a more user friendly password by the Administrator or it can be reset by the User." Below the text area is a large text box displaying the password "B@7NpJ%7GR". At the bottom are three buttons: "Copy password", "Copy message", and "Email message". An "OK" button is at the bottom right.

Random Password Set

A randomly generated password has been created for the new user. This password can be reset to a more user friendly password by the Administrator or it can be reset by the User.

B@7NpJ%7GR

Copy password Copy message Email message

OK

Click OK to close window.

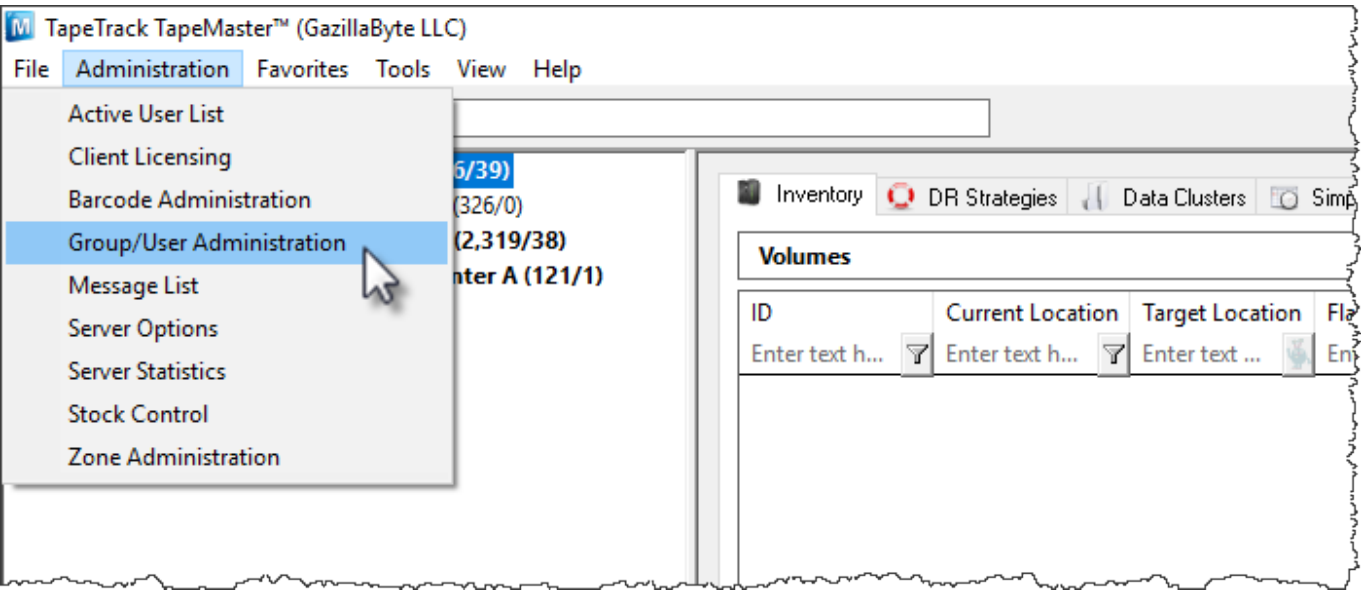

Enter your current password in the Current Password field.

Click OK to update your password and return you to the TapeTrack Lite start screen.

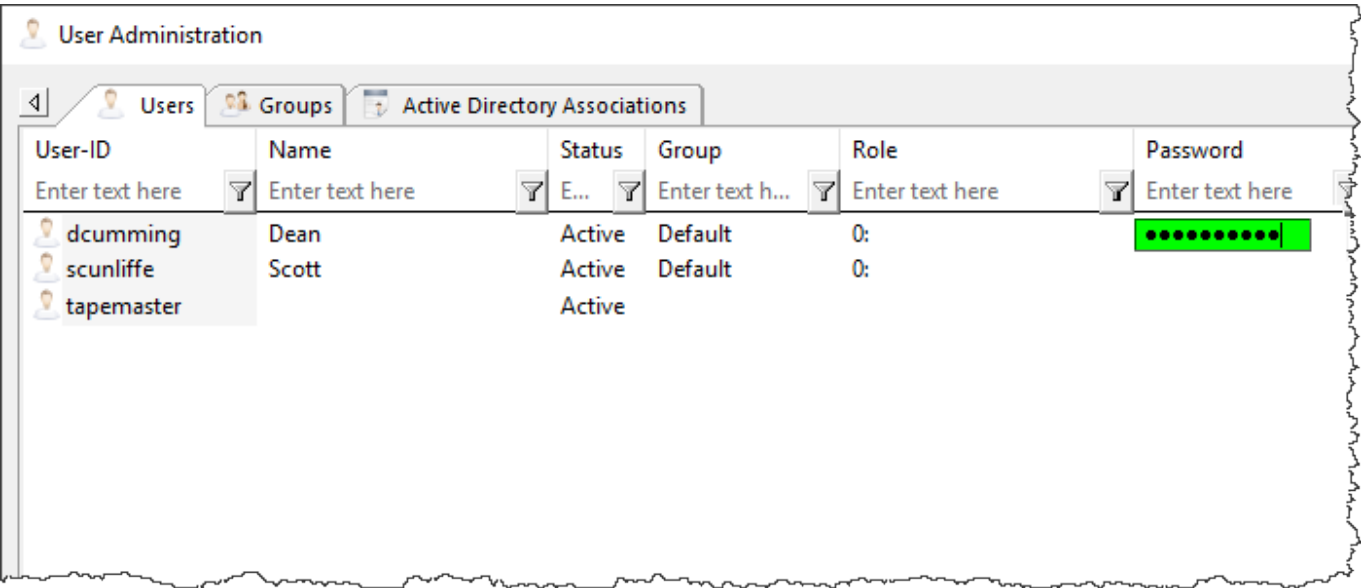

Changing Other Users Passwords

 Only users with [tapemaster rights](#) have access to the Administrative menu.

On the menu click Administration → Group/User Administration.

The password can be changed in this screen by simply clicking in the password field of the required user and typing the new password. If the password is longer than the display field you will need to expand the password column to an appropriate size before entering.

Click the X at the top of the screen to exit.

It is a good practice to have any user you change the password for to have them [reset](#) their password the next time they logon.
