

# Slot Management

Slot management allows you to block (or unblock) selected slots to be removed from the list of available slots for volume allocation. This is beneficial if you have damaged slots in your racking that can no longer physically accept volumes or if you simply don't want certain slots being used.

From the **View Repository Map** window, accessed by right-clicking a repository, right-click a selected slot, or range of slots, and select **Slot Management**→**Block**.

Blocked slots will be displayed with the text struck through and a black background.

Offsite Vault

Slot	Zone	Location	Volume-ID	Status
000001	GEMTRAC1	1.1	000016L6	Empty
000002	GEMTRAC1	1.2	000017L6	Occupied
000003	GEMTRAC1	1.3	000018L6	Occupied
000004	GEMTRAC1	1.4	000019L6	Occupied
000005	GEMTRAC1	1.5	000020L6	Occupied
000006	GEMTRAC1	1.6	000021L6	Occupied
000007	GEMTRAC1	1.7	000022L6	Occupied
