History Rewind

History rewind function allows you to view your inventory of volumes based on a selected date, or differences in inventory between selected dates.

History Rewind On A Selected Date

Right click in the inventory window and select View \rightarrow History Rewind

Volumes will be displayed, in volume-ID order by default, showing location on the selected date. Volumes that were not part of the inventory at that date, but are currently, will be displayed as **Did not exist** with a red flag icon.

Selected date may be changed by either selecting another date from the drop-down list or by scrolling, forwards or backwards, with the arrow buttons at the top right of the window.

Results can be filtered on each/all columns.

Volumes within the list can then be exported to file by selecting the required volumes from the list and then right-clicking and selecting Export \rightarrow and then choosing file type.
