## Operations

- Add Note: The Add Note function will launch the Add Note window.
- Check for Duplicate within Customer: The "Check for Duplicate within Customer" will search the current Customer for Volumes with the same Volume-ID as the selected Volume in all media types.
- **Confirm**: The "Confirm" operation confirms the selected Volume at its Target Location when it is in a move.
- **Container**: The Container Menu provides three options:
  - Register: Register will add the designation of "Container" to a Volume.
  - De-Register: De-Register will remove the designation of "Container" from a Volume.
  - Purge: Purge will remove all Volumes from a Container.
- **Detect missing volumes in a sequence** will scan through the selected Volumes and list any Volume-ID's missing from the numerical sequence.
- Find Duplicate Slots: The "Find Duplicate Slots" will find Volumes that have been assigned to the same Slot as another Volume.

- Modify: The Modify Menu contains options to:
  - Add a Volume to a Container
  - Add a Volume to a Data Cluster
  - Set a Volume's Home Repository
  - Modify Flags
  - Modify Return Dates.
- Scan: The Scan menu contains options to :
  - Scan to Add Volumes: The "Scan to Add Volumes" Function will launch the Barcode Scanning Window and add the Volumes being scanned to the selected Customer and Media Type.
  - **Scan to Select Volumes**: The "Scan to Select Volumes" function will launch the Barcode Scanning Window and select the Volumes being scanned in the Volume List.
  - **Search Next Move Dates** opens the Next Move Date Search window. This enables you to search for tapes moving on a certain day or days within the current media.
- Show Move Dates in Month View: The Show Move Dates in Month View function will launch a window displaying the move dates for the selected Volume(s) in a calendar format.
- Slots
  - **Find Duplicate Slots** will search the current Media Type for any slots occupied by multiple Volumes.
