Simple Management Rules

Simple Management rules allow automation of a Volumes next move date based on matching preset criteria. The rules can filter off Media-ID, Volume-ID, Data cluster, from Repository and/or to Repository values.

Enabling Simple Management

Simple Management can be enabled for a Target Repository, or for a specific Volume.

When enabled at a Repository level, a matching Simple Management Rule must exist with a matching scope for every Volume moved to that Repository.

When enabled for a specific Volume, a Simple Management Rule must exist with a matching scope that for every Repository that the Volume will move to.

Enabling at a Repository level

- `Force Simple Management` option is set to `True`.
- As Simple Management sets a Next Move Date, and Volumes are traditionally moved using the TMSS10MovePending program, it is recommended that the `Next Repository` option is set to an appropriate value.

Edit Repository: Library ✕

Creating a Simple Management Rule

From the required Customer's Media type select the Simple Management tab.

Right-click in the main window and select Add, or press `Insert` on your keyboard.

In the identity tab, insert a description to describe the rule.

Edit New Simple Management Rule　　　　　　　　✕

　🔘 Identity　　📇 Options　　🔟 Calculations

Index/Description

Customer-ID	US04	Nashville Data Center

Index　　　　　　0

Description
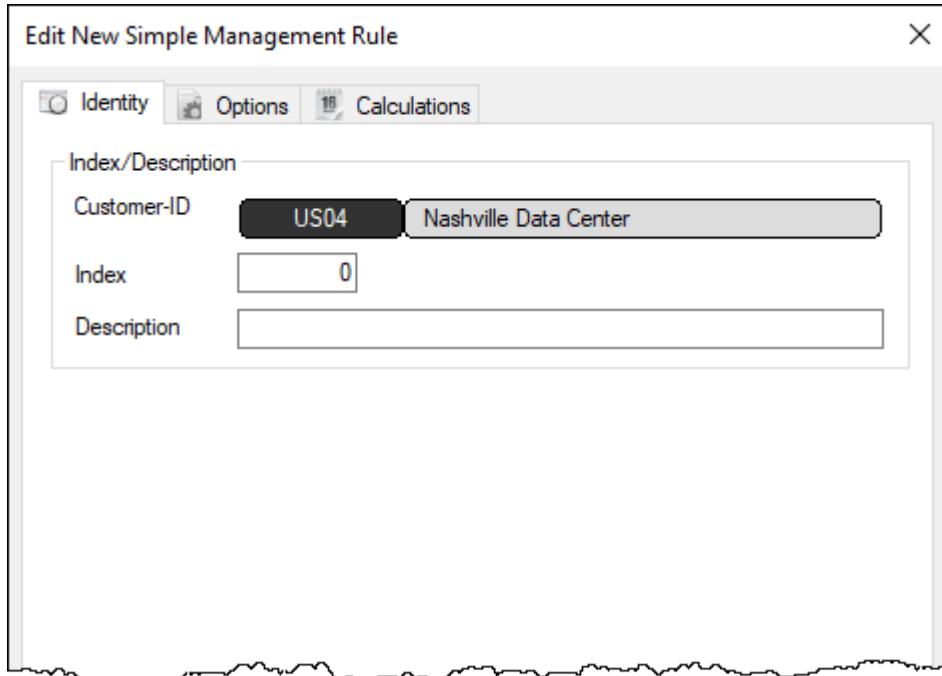

Under the Options tab insert the scope of the rule:

- Active
- Restore
- Scope
    - Exclusion Days
    - Movement Direction
        - From Repository Filter
        - To Repository Filter
    - Volume Attributes
        - Media-ID Filter
        - Volume-ID Filter
        - Data Cluster
