

# Volume Current Location

A volumes current location is the last repository the volume was confirmed at. If the current location matches the target location it is also the physical location the volume should be at.

If slotting is enabled the current location will include the slot allocation details as well.

The screenshot shows a software window titled "Edit Volume: 000013L6". It has a tabbed interface with the following tabs: Datasets, Attributes, VeriScore™, DR Strategies, Options, Catalog, Identity, Target Location, Current Location (selected), Scanned Location, Notes, and History. The "Current Location" tab is active, displaying a tree view on the left and a data table on the right.

**Tree View:**

- Virtual Location
  - Repository: Offsite Vault
  - Slot: 282
- Physical Location
  - Zone: Rack C
  - Slot: 9.2
- Update Statistics
  - When
    - Date: Tuesday, June 08, 2021 (0 days ago)
    - Time: 11:49:25
    - UTC Offset: 600 minutes
    - Time at source: Tuesday, June 08, 2021 - 11:49:25
    - Time Zone: AUS Eastern Standard Time
  - From
    - Machine Name: 127.0.0.1 (GazillaByte)
  - Details
    - Connection Count: 2,134
    - First Connection: Sunday, August 04, 2019 - 16:44:36
    - Last Connection: Tuesday, June 08, 2021 - 09:29:19
    - Interface: TapeTrack TapeMaster
    - Operating System: Windows
  - As
    - User-ID: doco
    - User Name: doco

**Data Table:**

Repository	Offsite Vault
Slot	282
Zone	Rack C
Slot	9.2
Date	Tuesday, June 08, 2021 (0 days ago)
Time	11:49:25
UTC Offset	600 minutes
Time at source	Tuesday, June 08, 2021 - 11:49:25
Time Zone	AUS Eastern Standard Time
Machine Name	127.0.0.1 (GazillaByte)
Connection Count	2,134
First Connection	Sunday, August 04, 2019 - 16:44:36
Last Connection	Tuesday, June 08, 2021 - 09:29:19
Interface	TapeTrack TapeMaster
Operating System	Windows
User-ID	doco
User Name	doco

At the bottom right of the window are three buttons: Save, Cancel, and Help.

The **Relative location** panel (A) displays:

- Repository-ID and Description.
- Slot Number allocated.
- Maximum number of slots assigned to the target repository.

If slotting is not enabled, or no zones mapped to the repository, slot number and maximum will display as zero.

The **Absolute Location** (B) displays:

- The Zone-ID.
- Level location.
- Slot location

The absolute location is a physical representation of where the slot is located based on racking parameters, such as number of drawers/shelves and slots per drawer/shelf, to enable users to easily locate the current location. If slotting is not enabled, or no zones mapped to the repository, Zone-ID will be blank, level and slot will display as zero.

Expanding the lower section **Update Statistics** (C) displays information of when, where and who placed the volume into a move to the target location. These values are set automatically on creation of the volume and are non editable fields.
