

Volume Current Location

A [Volumes](#) Current Location is the last [Repository](#) the [Volume](#) was confirmed at. If the Current Location matches the Target Location it is also the physical location the [Volume](#) should be at.

If [Slotting](#) is enabled the Current Location will include the [Slot](#) allocation details as well.

The screenshot shows a software window titled "Edit Volume: 000013L6". It has a tabbed interface with the following tabs: Datasets, Attributes, VeriScore™, DR Strategies, Options, and Catalog. Below these are sub-tabs: Identity, Target Location, Current Location (selected), Scanned Location, Notes, and History. The "Current Location" tab is active, displaying a tree view on the left with expandable sections: Virtual Location, Physical Location, Update Statistics, When, From, Details, and As. The main area shows the details for the selected section.

Virtual Location	
Repository	Offsite Vault
Slot	282

Physical Location	
Zone	Rack C
Slot	9.2

Update Statistics	
When	
Date	Tuesday, June 08, 2021 (0 days ago)
Time	11:49:25
UTC Offset	600 minutes
Time at source	Tuesday, June 08, 2021 - 11:49:25
Time Zone	AUS Eastern Standard Time
From	
Machine Name	127.0.0.1 (GazillaByte)
Details	
Connection Count	2,134
First Connection	Sunday, August 04, 2019 - 16:44:36
Last Connection	Tuesday, June 08, 2021 - 09:29:19
Interface	TapeTrack TapeMaster
Operating System	Windows
As	
User-ID	doco
User Name	doco

At the bottom right of the window are three buttons: Save, Cancel, and Help.

The Virtual Location panel displays:

- [Repository](#).
- [Slot](#) Number allocation.

If slotting is not enabled, or no zones mapped to the repository, slot number field will not be displayed.

The **Absolute Location** displays:

- The Zone-ID.

- Level location.
- [Slot](#) location

The **Absolute Location** is a physical representation of where the slot is located based on racking parameters, such as number or drawers/shelves and slots per drawer/shelf, to enable users to easily locate the Current Location. If Slotting is not enabled, or no Zones mapped to the Repository, Zone-ID will be blank, level and slot will display as zero.

Expanding the lower section **Update Statistics** displays information of when, where and who placed the volume into a move to the target location. These values are set automatically on creation of the volume and are non editable fields.
