

Volume Current Location

A **Volumes** Current Location is the last **Repository** the **Volume** was confirmed at. If the Current Location matches the Target Location it is also the physical location the **Volume** should be at.

If **Slotting** is enabled the Current Location will include the **Slot** allocation details as well.

The screenshot shows a software window titled "Edit Volume: 000013L6" with a close button (X) in the top right corner. The window has a menu bar with the following items: Datasets, Attributes, VeriScore™, DR Strategies, Options, and Catalog. Below the menu bar is a toolbar with icons for Identity, Target Location, Current Location, Scanned Location, Notes, and History. The main content area is a tree view with the following sections:

- Virtual Location**
 - Repository: Offsite Vault
 - Slot: 282
- Physical Location**
 - Zone: Rack C
 - Slot: 9.2
- Update Statistics**
 - When**
 - Date: Tuesday, June 08, 2021 (0 days ago)
 - Time: 11:49:25
 - UTC Offset: 600 minutes
 - Time at source: Tuesday, June 08, 2021 - 11:49:25
 - Time Zone: AUS Eastern Standard Time
 - From**
 - Machine Name: 127.0.0.1 (GazillaByte)
 - Details**
 - Connection Count: 2,134
 - First Connection: Sunday, August 04, 2019 - 16:44:36
 - Last Connection: Tuesday, June 08, 2021 - 09:29:19
 - Interface: TapeTrack TapeMaster
 - Operating System: Windows
 - As**
 - User-ID: doco
 - User Name: doco

At the bottom right of the window, there are three buttons: "Save" (highlighted with a blue border), "Cancel", and "Help".

The Virtual Location panel displays:

- **Repository**.
- **Slot** Number allocation.

If **Slotting** is not enabled, or no **Zones** mapped to the **Repository**, **Slot** number field will not be displayed.

The Physical Location displays:

- The **Zone**.

- [Slot location](#)

The **Physical Location** is a physical representation of where the [Slot](#) is located based on racking parameters, such as number of drawers/shelves and [Slots](#) per drawer/shelf, to enable users to easily locate the **Current Location**. If Slotting is not enabled, or no Zones mapped to the Repository, Zone will display as No-Alloc, Slot will display as zero.

Expanding the lower section **Update Statistics** displays information of when, where and who placed the [Volume](#) into a move to the **Target Location**. These values are set automatically on creation of the volume and are non editable fields.
