

Volume Current Location

A **Volumes** Current Location is the last **Repository** the **Volume** was confirmed at. If the Current Location matches the Target Location it is also the physical location the **Volume** should be at.

If **Slotting** is enabled the Current Location will include the **Slot** allocation details as well.

The screenshot shows a software window titled "Edit Volume: 000013L6". The window has a menu bar with options: Datasets, Attributes, VeriScore™, DR Strategies, Options, and Catalog. Below the menu bar is a toolbar with icons for Identity, Target Location, Current Location, Scanned Location, Notes, and History. The main content area is divided into several sections:

- Virtual Location**:

Repository	Offsite Vault
Slot	282
- Physical Location**:

Zone	Rack C
Slot	9.2
- Update Statistics**:
 - When**:

Date	Tuesday, June 08, 2021 (0 days ago)
Time	11:49:25
UTC Offset	600 minutes
Time at source	Tuesday, June 08, 2021 - 11:49:25
Time Zone	AUS Eastern Standard Time
 - From**:

Machine Name	127.0.0.1 (GazillaByte)
--------------	-------------------------
 - Details**:

Connection Count	2,134
First Connection	Sunday, August 04, 2019 - 16:44:36
Last Connection	Tuesday, June 08, 2021 - 09:29:19
Interface	TapeTrack TapeMaster
Operating System	Windows
 - As**:

User-ID	doco
User Name	doco

At the bottom right of the window are three buttons: Save, Cancel, and Help.

The Virtual Location panel displays:

- **Repository**.
- **Slot** Number allocation.

If **Slotting** is not enabled, or no **Zones** mapped to the **Repository**, **Slot** number field will not be displayed.

The Physical Location displays:

- The **Zone**.

- [Slot location](#)

The Physical Location is a physical representation of where the [Slot](#) is located based on racking parameters, such as number of drawers/shelves and [Slots](#) per drawer/shelf, to enable users to easily locate the Current Location. If [Slotting](#) is not enabled, or no [Zones](#) mapped to the [Repository](#), [Zone](#) will display as No-Alloc, [Slot](#) will display as zero.

Expanding the lower section Update Statistics displays information of when, where and who placed the [Volume](#) into a move to the Target Location. These values are set automatically on creation of the [Volume](#) and are non editable fields.
