Volume History

Volume history tab displays all historical records attached to a volume including creation, location movements and user interactions.

Historical events for the volume display summary details on the **History** tab.

For each of these events, the date, time type and locations are listed.

Types of historical events include:

- Added Creation of volume.
- Deleted Removal of volume.
- Target New Target location, volume place in a move.
- Scanned-Out Scanning volume out to record leaving current repository.
- Scanned-In Scanning in volume to confirm arrival at target repository.
- Date Adding next move date to volume.

Right clicking on a historical entry, or double clicking, and selecting Details will open a **History Details** window. This provides a more verbose listing of the historical entry including:

When

- Date
- o Time of entry
- UTC offset
- Time at source
- Time zone at source
