# Volume History

Volume history tab displays all historical records attached to a volume including creation, location movements and user interactions.

Historical events for the volume display summary details on the **History** tab.

For each of these events, the date, time type and locations are listed.

Types of historical events include:

- Added - Creation of volume.
- Deleted - Removal of volume.
- Target - New Target location, volume place in a move.
- Scanned-Out - Scanning volume out to record leaving current repository.
- Scanned-In - Scanning in volume to confirm arrival at target repository.
- Date - Adding next move date to volume.

Right clicking on a historical entry, or double clicking, and selecting `Details` will open a **History Details** window. This provides a more verbose listing of the historical entry including:

- **When**
  - Date
  - Time of entry
  - UTC offset
  - Time at source
  - Time zone at source
- User
  - User ID

- - - User Name
  - Using
    - IP address of user access
    - TapeTrack interface or software used
    - User operating system
  - Micellaneous
    - Next move date
    - Fields Updated
  - Repository
    - From
      - Relative
        - Repository
        - Slot
      - Absolute
        - Zone
        - Zone Slot
    - To
      - Relative
        - Repository
        - Slot
      - Absolute
        - Zone
        - Zone Slot
