Historical events for the volume display summary details on the **History** tab.

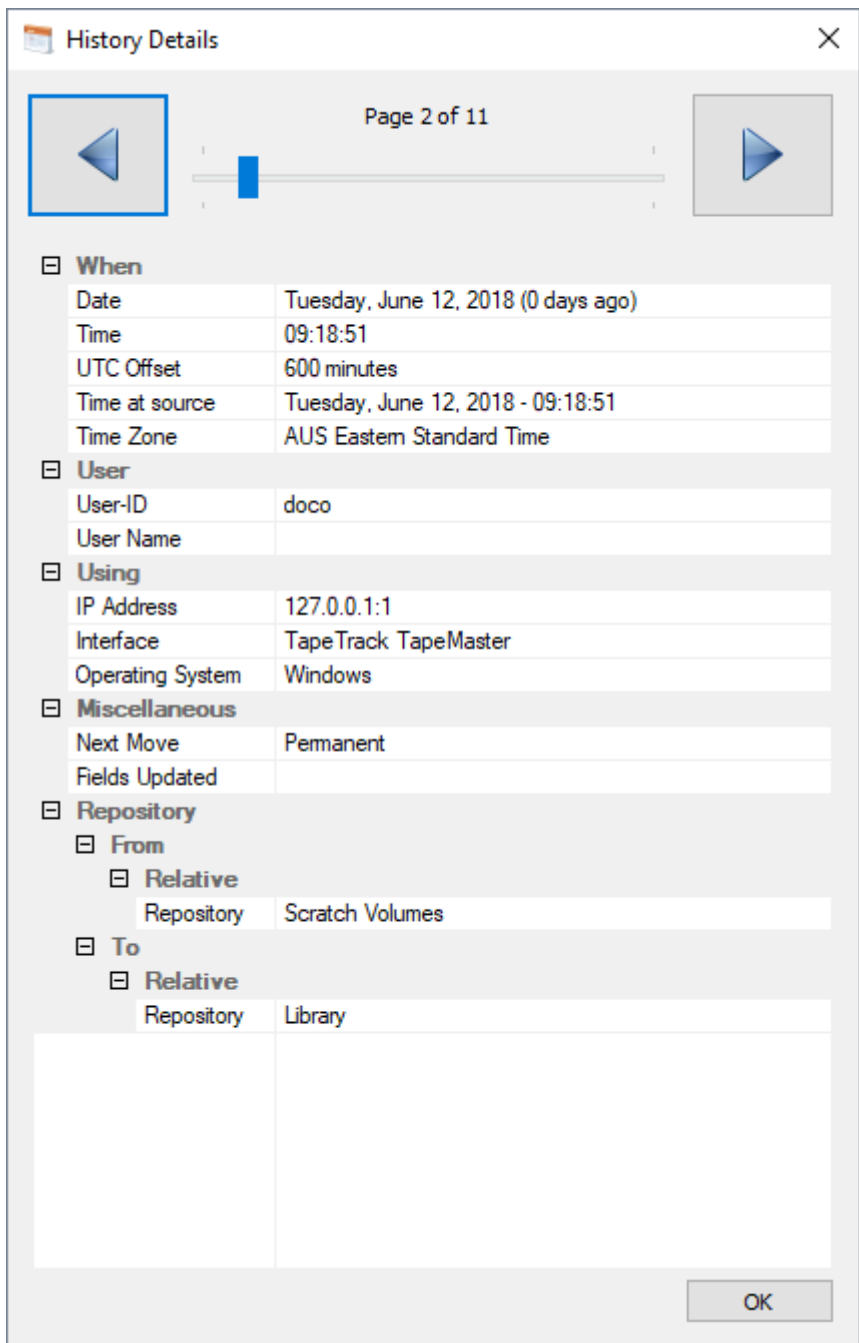

For each of these events, the date, time type and locations are listed.

Types of historical events include:

- Added - Creation of volume.
- Deleted - Removal of volume.
- Target - New Target location, volume place in a move.
- Scanned-Out - Scanning volume out to record leaving current repository.
- Scanned-In - Scanning in volume to confirm arrival at target repository.
- Date - Adding next move date to volume.

History Details

Right clicking on a historical entry, or double clicking, and selecting **Details** will open a **History Details** window.

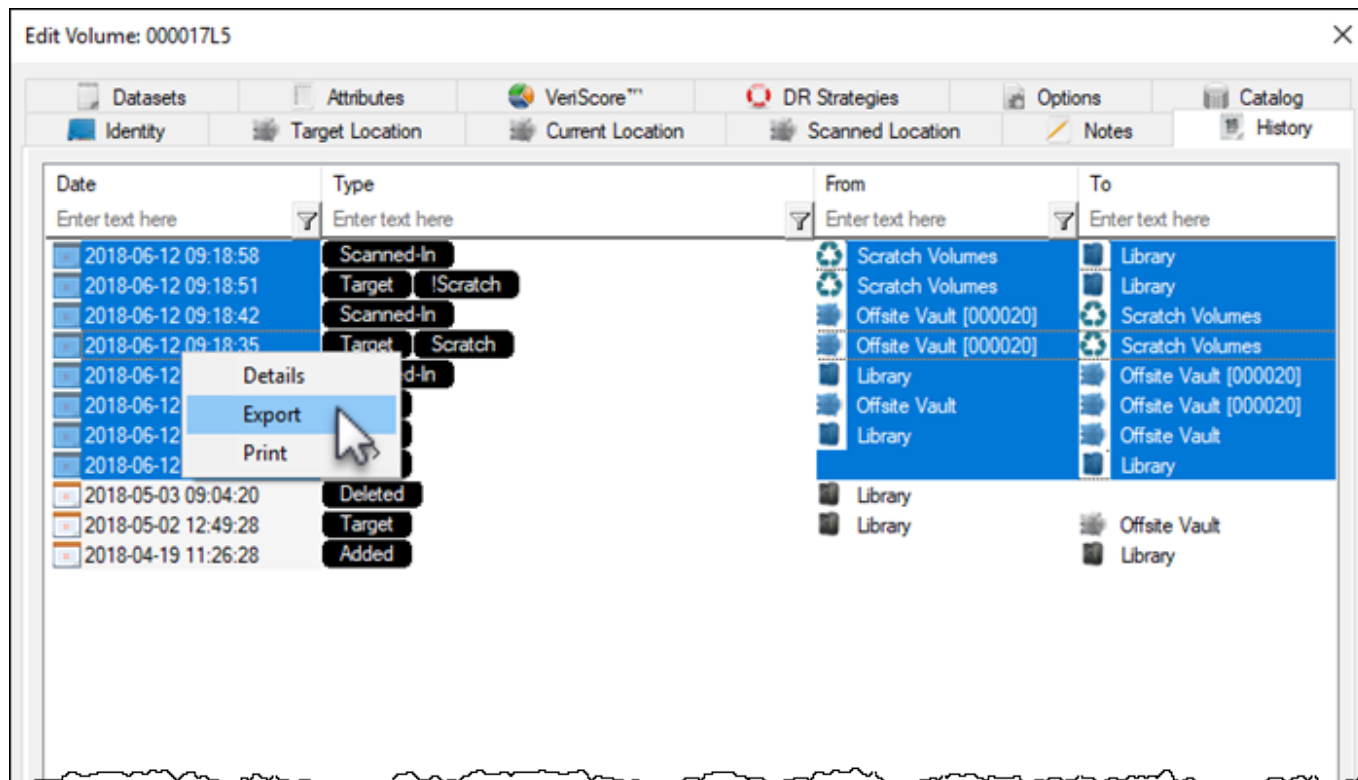

This provides a more verbose listing of the historical entry including:

- Dates and Times including UTC offset, source time and time zone.
- User performing the action including IP, TapeTrack software and operating system.
- Next Move date
- Locations including to, from and zone information if applicable.

Exporting History

To export historical entries, select required entry or range select entries (ctrl + click, shift + click), right click and select Export and follow prompts to export to required file type.

Export Sample

Export historical records to text file.

```
