## **Volume Identity**

The Identity tab of the Volumes properties displays the Volume's unique identification Attributes including Customer-ID, Media-ID and Volume-ID as well as other data specific to the volume's identity.

The **Volume Attributes** panel displays:

- Customer-ID and Description.
- Media-ID and Description.
- Volume-ID.

The Volume-ID is set on creation of the Volume and is then, in normal operation, a non editable field as are the Customer-ID and Media-ID fields.

The center panel shows a barcode image of the Volume-ID.

Expanding the lower section **Update Statistics** displays information of when, where and who created the **Volume**. These values are captured automatically on creation of the **Volume** and are non editable
