

# Volume Scanned Location

A **Volumes** Current Location is the last **Repository** the **Volume** was confirmed at. If the Current Location matches the Target Location it is also the physical location the **Volume** should be at.

If **Slotting** is enabled the Current Location will include the **Slot** allocation details as well.

The screenshot shows a software interface for editing a volume. The title bar reads 'Edit Volume: 000013L6'. The interface has a menu bar with options: Datasets, Attributes, VeriScore™, DR Strategies, Options, and Catalog. Below the menu bar are several tabs: Identity, Target Location, Current Location, Scanned Location, Notes, and History. The main content area is divided into three expandable sections:

- Virtual Location:**
  - Repository: Offsite Vault
  - Slot: 282
- Physical Location:**
  - Zone: Rack C
  - Slot: 9.2
- Update Statistics:**
  - When:**
    - Date: Tuesday, June 08, 2021 (0 days ago)
    - Time: 11:49:25
    - UTC Offset: 600 minutes
    - Time at source: Tuesday, June 08, 2021 - 11:49:25
    - Time Zone: AUS Eastern Standard Time
  - From:**
    - Machine Name: 127.0.0.1 (GazillaByte)
    - Details:**
      - Connection Count: 2,134
      - First Connection: Sunday, August 04, 2019 - 16:44:36
      - Last Connection: Tuesday, June 08, 2021 - 09:29:19
    - Interface: TapeTrack TapeMaster
    - Operating System: Windows
  - As:**
    - User-ID: doco
    - User Name: doco

At the bottom right of the dialog box are three buttons: Save, Cancel, and Help.

The Virtual Location panel displays:

- **Repository**.
- **Slot** Number allocation.

If **Slotting** is not enabled, or no **Zones** mapped to the **Repository**, **Slot** number field will not be displayed.

The Physical Location displays:

- The **Zone**.

- [Slot](#) location

The **Physical Location** is a physical representation of where the [Slot](#) is located based on racking parameters, such as number of drawers/shelves and [Slots](#) per drawer/shelf, to enable users to easily locate the Current Location. If [Slotting](#) is not enabled, or no [Zones](#) mapped to the [Repository](#), [Zone](#) will display as No-Alloc, [Slot](#) will display as zero.

Expanding the lower section **Update Statistics** displays information of when, where and who placed the [Volume](#) into a move to the Target Location. These values are set automatically on creation of the [Volume](#) and are non editable fields.
