

Volume Scanned Location

The volume scanned location displays the last repository that the volume was confirmed at.

If slotting is enabled the target location will, when a slot is assigned, include the slot allocation details as well.

The screenshot shows a software window titled "Edit Volume: 000013L6". It has a menu bar with "Datasets", "Attributes", "VeriScore™", "DR Strategies", "Options", and "Catalog". Below the menu bar is a tabbed interface with tabs for "Identity", "Target Location", "Current Location", "Scanned Location", "Notes", and "History". The "Scanned Location" tab is active, displaying a tree view on the left and a data table on the right.

Virtual Location

Repository	Offsite Vault
Slot	282

Physical Location

Zone	Rack C
Slot	9.2

Update Statistics

When

Date	Tuesday, June 08, 2021 (0 days ago)
Time	11:49:25
UTC Offset	600 minutes
Time at source	Tuesday, June 08, 2021 - 11:49:25
Time Zone	AUS Eastern Standard Time

From

Machine Name	127.0.0.1 (GazillaByte)

Details

Connection Count	2,134
First Connection	Sunday, August 04, 2019 - 16:44:36
Last Connection	Tuesday, June 08, 2021 - 09:29:19
Interface	TapeTrack TapeMaster
Operating System	Windows

As

User-ID	doco
User Name	doco

At the bottom right of the window are three buttons: "Save", "Cancel", and "Help".

The **Relative location** panel (A) displays:

- Repository-ID and Description.
- Slot Number allocated.
- Maximum number of slots assigned to the target repository.

If slotting is not enabled, or no zones mapped to the repository, slot number and maximum will display as zero.

The **Absolute Location** (B) displays:

- The Zone-ID.
- Level location.
- Slot location

The absolute location is a physical representation of where the slot is located based on racking parameters, such as number of drawers/shelves and slots per drawer/shelf, to enable users to easily locate the volume. If slotting is not enabled, or no zones mapped to the repository, Zone-ID will be blank, level and slot will display as zero.

Expanding the lower section **Update Statistics** (C) displays information of when, where and who scanned the volume into the location. These values are set automatically when the volume is scanned in and are non editable fields.
