

Volume Target

When a volume is placed in a move from its' current location to another location, that other location is a target location until the volume is has a confirmed arrival.

If slotting is enabled the target location will, when a slot is assigned, include the slot allocation details as well.

The screenshot shows the 'Edit Volume: 000013L6' window. The interface includes a top toolbar with tabs for Datasets, Attributes, VeriScore™, DR Strategies, Options, and Catalog. Below the toolbar are sub-tabs for Identity, Target Location, Current Location, Scanned Location, Notes, and History. The main content area is a tree view with the following sections:
