

Volume Target Location

When a [Volume](#) is placed in a move from its' Current Location to another Location, that other Location is a Target Location.

Once the [Volume](#) is confirmed at the Target Location, the [Volume's](#) Current Location is updated to match the Target Location, removing the [Volume's](#) Move (M) [Flag](#) and Move Status.

If slotting is enabled the Target Location will, when a Slot is assigned, include the Slot Allocation details as well.

The screenshot shows the 'Edit Volume: 000013L6' window with the 'Target Location' tab selected. The window contains a tree view of location details:

- Virtual Location**
 - Repository: Offsite Vault
 - Slot: 282
- Physical Location**
 - Zone: Rack C
 - Slot: 9.2
- Update Statistics**
 - When**
 - Date: Monday, April 05, 2021 (63 days ago)
 - Time: 15:25:09
 - UTC Offset: 600 minutes
 - Time at source: Monday, April 05, 2021 - 15:25:09
 - Time Zone: AUS Eastern Standard Time
 - From**
 - Machine Name: 127.0.0.1 (GazillaByte)
 - Details**
 - Connection Count: 2,134
 - First Connection: Sunday, August 04, 2019 - 16:44:36
 - Last Connection: Tuesday, June 08, 2021 - 09:29:19
 - Interface: TMSS10SlotAllocation
 - Operating System: Windows
 - As**
 - User-ID: doco
 - User Name: doco

At the bottom of the window, there are three buttons: 'Save', 'Cancel', and 'Help'.

The **Relative location** panel (A) displays:

- [Repository-ID](#) and [Description](#).
- Slot Number allocated.
- Maximum number of Slots assigned to the Target [Repository](#).

If slotting is not enabled, or no zones mapped to the [Repository](#), Slot number and maximum will

display as zero.

The **Absolute Location** (B) displays:

- The Zone-ID.
- Level location.
- Slot location

The absolute location is a physical representation of where the Slot is located based on racking parameters, such as number or drawers/shelves and Slots per drawer/shelf, to enable users to easily locate the Target Location. If Slotting is not enabled, or no Zones mapped to the [Repository](#), Zone-ID will be blank, level and Slot will display as zero.

Expanding the lower section **Update Statistics** (C) displays information of when, where and who placed the [Volume](#) into a move to the Target Location. These values are set automatically on creation of the [Volume](#) and are non editable fields.
