

Volume Target Location

When a [Volume](#) is placed in a move from its' Current Location to another Location, that other Location is a Target Location.

Once the [Volume](#) is confirmed at the Target Location, the [Volume's](#) Current Location is updated to match the Target Location, removing the [Volume's](#) Move (M) [Flag](#) and Move Status.

If [Slotting](#) is enabled the Target Location will, when a [Slot](#) is assigned, include the [Slot](#) Allocation details as well.

The screenshot shows the 'Edit Volume: 000013L6' window with the 'Virtual Location' panel expanded. The panel displays the following information:

Virtual Location	
Repository	Offsite Vault
Slot	282
Physical Location	
Zone	Rack C
Slot	9.2
Update Statistics	
When	
Date	Monday, April 05, 2021 (63 days ago)
Time	15:25:09
UTC Offset	600 minutes
Time at source	Monday, April 05, 2021 - 15:25:09
Time Zone	AUS Eastern Standard Time
From	
Machine Name	127.0.0.1 (GazillaByte)
Details	
Connection Count	2,134
First Connection	Sunday, August 04, 2019 - 16:44:36
Last Connection	Tuesday, June 08, 2021 - 09:29:19
Interface	TMSS10SlotAllocation
Operating System	Windows
As	
User-ID	doco
User Name	doco

At the bottom of the window, there are three buttons: 'Save', 'Cancel', and 'Help'.

The **Virtual location** panel displays:

- Target [Repository](#).
- [Slot](#) Number allocated (if [Slotting](#) is enabled and [Volume](#) is allocated to a [Slot](#)).

If [Slotting](#) is not enabled, or no [Zones](#) mapped to the [Repository](#), [Slot](#) number will display as zero.

The **Physical Location** displays:

- The [Zone](#).
- Level location.
- [Slot](#) location

The physical location is a physical representation of where the [Slot](#) is located based on racking parameters, such as number or drawers/shelves and [Slots](#) per drawer/shelf, to enable users to easily locate the Target Location. If [Slotting](#) is not enabled, or no [Zones](#) mapped to the [Repository](#), [Zone](#) will be displayed as No-Alloc, [Slot](#) will display as zero.

Expanding the lower section **Update Statistics** (C) displays information of when, where and who placed the [Volume](#) into a move to the Target Location. These values are set automatically on creation of the [Volume](#) and are non editable fields.
